

## CONTRIBUTORS

J.L. DIVILBISS is Associate Professor in the Graduate School of Library and Information Science and Principal Research Engineer in the Coordinated Science Laboratory at the University of Illinois at Urbana-Champaign. He received his Ph.D. in electrical engineering from the University of Illinois and worked at Bell Telephone Laboratories before returning to head the engineering team for the Illiac III computer. He currently teaches courses in library automation, systems analysis, and telecommunications.

HOWARD FOSDICK is an independent consultant in the Chicago area and was previously a designer of online information systems for GTE Automatic Electric Laboratories in Northlake, Illinois. He holds master's degrees in library science from the University of Illinois and in computer science from Northern Illinois University. His papers have been published in journals in both fields. He is author of *Computer Basics for Librarians and Information Scientists* and *Structured PL/I Programming: For Textual and Library Processing*.

DAVID R. HOYT is a Technical Information Specialist with Technical Information Systems in the Science and Education Administration of the U.S. Department of Agriculture, where he is responsible for education, training, and public outreach. He holds a master's degree in library science from Indiana University and a master's degree in the history of ideas from Johns Hopkins University. He was previously a reference librarian and database searcher at the National Agricultural Library.

JEROME K. MILLER is a member of the faculty of the Graduate School of Library and Information Science at the University of Illinois at Urbana-Champaign. He received an Ed.D. in educational media from the University of Colorado. He is the author of several publications dealing with copyright, including two books: *Applying the New Copyright Law: A Guide for Educators and Librarians* and *U.S. Copyright Documents: An Annotated Collection for Use by Educators and Librarians*.

BRIAN NIELSEN is Head of the Reference Department of Northwestern University Library. He is a doctoral candidate in library science at the University of North Carolina at Chapel Hill and has held various positions in the library there, most recently that of Assistant Undergraduate Librarian for Reference and Instruction. He received the "best paper" award at the 1980 National Online Information Meeting for his paper

"Online Bibliographic Searching and the Deprofessionalization of Librarianship."

W. DAVID PENNIMAN is Vice-President, Planning and Research and Director, Development Division, OCLC Online Computer Library Center, Inc. He received a Ph.D. in communication theory from Ohio State University. He was previously Associate Manager of the Information Systems Section at Battelle Columbus Laboratories and Manager of the Research Department at OCLC. His experience in the field of information systems research and development has included involvement in the areas of human factors, human-computer interaction, computer networks, and information system evaluation. THOMAS B. HICKEY and HOWARD TURTLE, both senior research scientists at the OCLC Online Computer Library Center, Inc., helped with the preparation of the paper.

PETER B. SCHIPMA is Manager, Information Sciences at the IIT Research Institute. He holds both a B.S. in physics and an M.S. in science information from the Illinois Institute of Technology. He has been with IITRI since 1967, where he has managed several research contracts and grants in the information sciences area. His responsibilities include serving as Manager of the Computer Search Center at IITRI and as Director of the Computer Support Center of the National Cancer Institute International Cancer Research Data Bank Program.

LINDA C. SMITH is a member of the faculty of the Graduate School of Library and Information Science at the University of Illinois at Urbana-Champaign. She received a Ph.D. from the School of Information Studies at Syracuse University. Her fields of interest include information retrieval, library automation, and science reference service.

RICHARD H. VEITH is currently a consultant with Logica, Inc., New York, working on videotex and teletext projects. He received his Ph.D. in information studies from Syracuse University, and an M.A. in radio and television from San Francisco State University. He has previously been an information systems specialist with Informatics, Inc. and a lecturer at San Francisco State University. His publications include a book on two-way cable television in the United States, and a forthcoming book on international computer networks.

RONALD L. WIGINGTON is Director of Research and Development for Chemical Abstracts Service. He received a Ph.D. in electrical engineering from University of Kansas, and graduated from the Advanced Management Program of the Harvard Business School. His experience

includes work in computer technology and electronics research and development in the Department of Defense and the Bell Telephone Laboratories. He has participated in a wide variety of advisory boards and study panels, and is the author of numerous papers on computer techniques, library topics, and information systems.

LAWRENCE A. WOODS is Head of Research and Development for Purdue University Libraries. He holds a master's degree in library science from Simmons College. Before coming to Purdue he was Chief of Systems Design and Maintenance for Dartmouth College Libraries. He has recently organized and chaired two workshops on Microcomputers in Libraries for the ASIS Special Interest Group on Library Automation and Networks, and he is also preparing a book on that topic.

## INDEX
