

CONTRIBUTORS

WINNIE CHAN is the Automated Records Maintenance Coordinator and Assistant Professor of Library Administration at the University of Illinois at Urbana-Champaign (UIUC) Library. She holds a B.S. in Chemistry from Chinese University of Hong Kong and an M.S. in Library Science from Louisiana State University. She was previously a serial cataloger/serials coordinator at the UIUC Library. Her current responsibilities include coordinating the online catalog production and batch maintenance activities, involvement in development and design of interface software for the online catalog, and troubleshooting of microcomputer software/hardware problems.

TIMOTHY W. COLE received both his B.S. in Aeronautical and Aerospace Engineering (1978) and his M.S. in Library and Information Science (1989) from the University of Illinois at Urbana-Champaign (UIUC). Since 1989, he has worked as Assistant Librarian at UIUC, with a joint appointment to the Engineering Library and the Beckman Institute Library. He has been heavily involved with the upgrading of microcomputer hardware and software throughout the UIUC library system that has taken place over the past three years. In particular, he has been one of the principal programmers working on the UIUC's microcomputer end-user interfaces to bibliographic databases. Prior to earning his library science degree, Mr. Cole worked as an aerospace engineer at Martin-Marietta Aerospace and at the Jet Propulsion Laboratory.

PRUDENCE W. DALRYMPLE is Director of the Office on Accreditation with the American Library Association (ALA). Formerly a faculty member of the Graduate School of Library and Information Science at the University of Illinois at Urbana-Champaign, she received her Ph.D. in Library and Information Studies from the University of Wisconsin-Madison. Dr. Dalrymple has published several articles in her fields of interest, which include information retrieval, particularly studies of end-user access to electronic information systems, and health sciences librarianship. Her experience prior to ALA includes more than

10 years as a reference librarian, search analyst, and manager in health sciences libraries.

CAROLYN M. GRAY is Associate Director at Brandeis University Libraries. She received a Ph.D. from the Florence Heller School of Social Policy, Brandeis University, an M.L.S. from the School of Library Science, University of Oklahoma, and a B.A. in English from the University of Missouri at St. Louis. Her responsibilities at Brandeis include library systems, public services, and library development. Dr. Gray has consulted with a number of different organizations in the area of library technology. Her fields of interest include information policy and scholarly communication. Sue Woodson-Marks, Ph.D., an anthropologist on the library staff, helped with the preparation of the paper.

M. E. L. JACOB is a writer, consultant, and publisher of *Entrak*. She teaches workshops in strategic planning and library networking. Ms. Jacob is active in a number of library and information science associations and societies and is a frequent speaker at conferences. She has worked at OCLC and in university, public, and special libraries.

KATHARINA KLEMPERER is Director of Library Automation at Dartmouth College. She holds a B.A. from Swarthmore College and an M.A. in Music from San Francisco State University, as well as an M.L.S. from the University of California at Berkeley. Prior to her appointment at Dartmouth, she was a member of the MELVYL system development team at the Division of Library Automation of the University of California.

DAVID V. LOERTSCHER is President, Hi Willow Research and Publishing. He has degrees from the University of Utah, the University of Washington, and a Ph.D. in Library Science from Indiana University. He has been a library media specialist in elementary and secondary schools in Nevada and Idaho and taught library media education at Purdue, the University of Arkansas, and the University of Oklahoma.

RICHARD E. LUCIER is University Librarian and Assistant Vice Chancellor for Academic Information Management at the University of California, San Francisco. He holds a B.M. in Music and Philosophy from the Catholic University of America and an M.L.S. in Library Science from Rutgers University; he has completed extensive work in health policy and administration at the University of North Carolina at Chapel Hill. Previously, Mr. Lucier was the cofounder and director of the Laboratory for Applied Research in Academic Information at the Johns Hopkins University. Known for his development of the Knowledge Management Model, he has special interests in scientific and scholarly communication, and the development and management

of scientific databases. Among his publications is a forthcoming book of knowledge management to be published by the Johns Hopkins University Press in 1993.

WILLIAM H. MISCHO is Engineering Librarian, Beckman Institute Librarian, and Professor of Library Administration at the University of Illinois at Urbana-Champaign. His research interests include enhanced access to bibliographic resources, interface design and development, and microcomputer applications in libraries.

RONNIE PETERS is Art Director at Dynamic Diagrams. He was educated as a graphic designer at the University of Canterbury, New Zealand, and has a master's degree from Rhode Island School of Design. He has worked as a designer at numerous positions in New Zealand and the United States including the Waikato Museum of Art and History, IRIS (Brown University's Institute for Research in Information and Scholarship), Studio Works (New York), and Graphic Design Continuum (Ohio). He won an award at the World Design Expo, Design Eye Competition in Japan. At Dynamic Diagrams, a design studio dedicated to the creation of information graphics in both print and electronic media, his work includes design and production of all aspects of both print and electronic publications. He also teaches part time at Rhode Island School of Design. He coauthored a paper, "Design of Hypermedia Publications: Issues and Solutions," presented as part of the conference, EP91.

JEAN ARMOUR POLLY is the Manager of Network Development and User Training at NYSERNet, Inc., the New York State Education and Research Network. She was formerly the Assistant Director for Public Services at the Liverpool Public Library in central New York. She has a B.A. in Medieval Studies and an M.S.L.S., both from Syracuse University. Author of two books and numerous articles in the library literature, she is currently a columnist for *Library Journal* on topics of technology and computer books. Her interests involve use of the Internet by the public in library settings as well as human/machine interface design.

JOE C. RADER is Associate Professor and Head of University Archives, University of Tennessee, Knoxville, Libraries. Prior to this appointment in July 1990, he served as Head of Circulation Services. Codirector for 15 months, in 1989-90, of a largely externally funded project to develop computer-based training for library staff, he has published several articles and made presentations based on the project and its results. Pre-librarianship careers, a summer's internship at the Lawrence Livermore Laboratory in California, and the experience of the Modern Archives Institute have contributed to the diversity represented in his

interests. He is a long-time active member of many local and regional information professional societies and national organizations, including the American Library Association, the American Association of University Professors, and the Society of American Archivists.

PETER SCOTT is Manager, Small Systems, at the University of Saskatchewan Libraries, Canada. He was formerly Order Unit Manager, Technical Services, at the same institution. He received his B.A. in Philosophy and Literature at the Middlesex Polytechnic, England, in 1973. He is a frequent speaker at library and networking conferences and is the author of many hypertext utilities including HYTELNET, HYPERVAX, HYENVOY, and HYDOS.

ARLENE MOORE SIEVERS is Head of the Information Acquisition Department at Case Western Reserve University Library. She received her M.L.S. from Indiana University and worked for a number of years in public libraries in Indiana. Her work in serials and library automation began as an account executive with Swets Subscription Service in the Netherlands. She is active in the United Kingdom Serials Group and is the North American Correspondent for their Journal *Serials*.

RUTH V. SMALL is Assistant Professor and Coordinator of the School Media Program in the School of Information Studies at Syracuse University. She received her Ph.D. in Instructional Design, Development and Evaluation at Syracuse University. Her areas of interest focus on how people access, process, and present multimedia information. She has designed and evaluated educational and training courses and materials for business and industry, schools, colleges and universities, and social services agencies and has published book chapters and articles, including "Learning Situations and Instructional Models" (with Charles M. Reigeluth) in *Educational Technology: Foundations* (edited by Robert M. Gagné), "The Contributions of Technology to Instruction and Learning" in the 1990 edition of *School Library Media Annual*, and "Information Based Education: An Investigation of the Nature and Role of Information Attributes in Education" (with Michael B. Eisenberg) in *Information Processing and Management*.

LINDA C. SMITH is Associate Professor in the Graduate School of Library and Information Science at the University of Illinois at Urbana-Champaign. She joined the faculty in 1977 and teaches in the areas of reference, science reference, and online information systems. Her research interests include information retrieval, artificial intelligence, and science information. She is active in a number of professional associations including the American Society for Information Science, the American Association for the Advancement of Science, and the Association for Library and Information Science Education.

VIRGINIA TIEFEL has been Director of Library User Education at the Ohio State University Library since 1978. She is a graduate of the University of Michigan School of Information and Library Studies and has published numerous articles on library user education. She is a recipient of the 1986 Miriam Dudley Bibliographic Instruction Award and was chosen Outstanding Ohio Academic Librarian in 1984. She is Project Director of Ohio State's Gateway to Information Project.

LESLIE TROUTMAN is Music-User Services Coordinator and Assistant Professor at the University of Illinois at Urbana-Champaign. A graduate of Bowling Green State University, the University of North Carolina at Chapel Hill, and the University of Illinois at Urbana-Champaign, her research interests include music materials in the online environment and the discography of early music. Currently, she is collaborating with Donald W. Krummel on a book about musical titles.
