Collaborative Paper Proposal

I think the scene where Sal gets pregnant and rushes off to get married should be elaborated on. After she rushes to get married in a court house it should go through what happened at the court house and the conversation they had before they went to get married. Then the story should go on to talk about her meeting with a doctor to get an illegal abortion and how much it was going to cost to do this act. We could also talk about the consequences of getting an abortion. The scene should also cover the act of the abortion and what happened that almost made Sal lose her life. For example, she could have started bleeding and they might not have been able to find where it was coming from at first.

The biographical and historical note was interesting because it has some brief history on when environmental geology started.

The scrapbook is useful and interesting to me because it contains pictures of how the geology department looked in the past and it also has some information about the cyclothem club. This was the first geology club developed at the university.

The history of the anniversary celebration is interesting because it has information about the history of the geology department and some of the clubs.
