FOREWORD

This is one of a long series of mimeographed or multilithed publications released annually by the Illinois Cooperative Crop Reporting Service. The format of this edition represents a marked change from that of preceding years, the most striking difference being size. The use of photographic reduction in preparing county tables has made it possible to discontinue the use of fourteen inch paper.

The contents of this bulletin are more inclusive than those of the past, providing most of our more important series of State estimates from 1945 to date. It serves therefore as a supplement to "Illinois Agricultural Statistics" (Circular 445). The latter, published during the past year, supplies all of the State series of agricultural statistics from the beginning of the various records through 1944. People having a continuing interest in such data should make Circular 445 a part of their permanent file since the material it contains will not be included in future publications.

County estimates of crops and livestock are shown for two years--preliminary estimates for the most recent year and revisions for the preceding year.
