The Grecian Fete

The Department of Architecture has in past years been the scene of many a splendid fete. These have usually been in period and often in very florid mood. This year witnessed a Classic Revival in a real sense and the show as a result was a Grecian Fete. A competition was held among the three upper classes for the design of the decoration and settings and was won by E. C. Berendes of the Seniors for the Hall and by C. L. Martin of the Juniors for the Library. The stairway approaches were executed by the Sophomores. Costumes as well as decorations were all authentic as to period and showed a great deal of accurate and painstaking study and labor. The great success of the fete was in large measure due to the efforts of the Fete Committee headed by J. P. Turner.
