6. How can the library make the Wikipedia App easier to use?

The wikipedia app was harder to navigate in comparsion with the regular wikipedia site. On the regular wikipedia site the information was organized by headings. All one had to do was click on the heading and then it show that particular information. However, with the Wikipedia site it went from
page 1 to the last page so if I wanted to find certain in information so I had
to go page by page. The regular wikipidea site is much more user friendly.
