Holden Thorp is chancellor of the University of North Carolina at Chapel Hill. A Carolina alumnus and faculty member, Chancellor Thorp was appointed July 2008 after serving as dean of UNC’s College of Arts and Sciences. He is a Kenan professor and an award-winning teacher and researcher. He also chaired the nationally recognized Department of Chemistry, where he has been a full professor since 1999. From 2001 to 2005, Thorp directed the Morehead Planetarium and Science Center, guiding efforts to expand the planetarium’s original emphasis to become a comprehensive science education center for North Carolina.

Thorp has published more than 130 scholarly articles on the electronic properties of DNA and RNA. He invented technology for electronic DNA chips that is the basis of 19 issued or pending U.S. patents. For his DNA chip technology, Thorp was recognized as one of the Top Innovators of 2001 by Fortune Small Business magazine. In 2005, Thorp co-founded Viamet Pharmaceuticals Inc., a biotechnology company targeting metalloenzymes in the fields of infectious disease, inflammation and oncology.

Thorp has received many honors for his research, including the National Science Foundation’s Presidential Young Investigator Award, an Alfred P. Sloan Fellowship, the David and Lucile Packard Fellowship for Science and Engineering, and both the New Faculty Award and Teacher-Scholar Award from the Camille and Henry Dreyfus Foundation. He received his bachelor of science degree with highest honors in chemistry from UNC in 1986. He earned a doctorate in chemistry from the California Institute of Technology in 1989, was a postdoctoral associate at Yale University and started his faculty career at N.C. State University. He joined the UNC faculty in 1993.

Edward Seidel is a physicist recognized worldwide for his work on numerical relativity and black holes, as well as in high-performance and grid computing. He was director of Louisiana State University’s (LSU) Center for Computation & Technology (CCT) from 2003 - 2008 and he is the Floating Point Systems Professor in LSU’s Departments of Physics & Astronomy and Computer Science. In addition to leading the CCT, he helped initiate, and is presently the chief scientist for, the $40 million Louisiana Optical Network Initiative. In 2008, the National Science Foundation selected Seidel as its director for the Office of Cyberinfrastructure, in which he oversees advances in supercomputing, high-speed networking, data storage and software development on a national level. Seidel retains his faculty positions as well as his affiliation with CCT at LSU, and he frequently returns to the center to advise on research, projects and other strategic initiatives.

Seidel earned his Ph.D. from Yale University in relativistic astrophysics. Prior to becoming CCT director, Seidel was a professor at the Max-Planck-Institute for Gravitational Physics (Albert Einstein Institute, or AEI) in Germany from 1996-2003. There, Seidel founded and led AEI’s numerical relativity and e-science groups, which became leading forces worldwide in solving Einstein’s equations using large-scale computers, and in distributed and grid computing. He was also a senior research scientist at the National Center for Supercomputing Applications and associate professor in the Physics Department at the University of Illinois, Urbana-Champaign.

Andrew Campbell is the director of Prometheus (www.prometheus.net.au) a scientific group dedicated to the research and application of technology towards the advancement of mental health treatments in such disorders as attention deficit/hyperactivity disorder (ADHD), depression, anxiety, stress, self-esteem and learning difficulties. He is a registered psychologist in the Australian state of New South Wales, where he runs a private clinic at the Brain and Mind Research Institute at the University of Sydney. His practice is dedicated to the treatment of child and adolescent psychological disorders, specializing in the use of traditional developmental psychological therapy, as well as utilizing new cyber-psychological approaches for emerging problems such as computer game obsesssional behavior (a.k.a. computer game addiction). Campbell has been interviewed extensively on the subject of cyberpsychology in international media and has a growing publication record in scientific journals.

Campbell received his Ph.D. in psychology, a MappSc. in psychology and a graduate diploma of higher education (awarded with merit) all from the University of Sydney. He received the Early Career Research Excellence Award-Faculty of Health Sciences from the University of Sydney in 2008.
Welcome to Chapel Hill and the fourth annual iConference - iSociety: research, education, engagement! The iSchools Caucus and the 2009 iConference Planning Committee are delighted that you have joined us for a conference which features three plenary sessions, nine paper presentations, fourteen roundtable and ten wildcard discussions, workshops, a pre-conference doctoral colloquium and junior faculty mentoring session and so much more. We hope you have an opportunity to attend as many sessions as possible. The program is truly exceptional!

This year’s iConference welcomes guests from around the world making it a truly international experience. Participants from Australia, Canada, Ghana, India, Italy, Japan, Malaysia, Singapore, to name a few, are joining us to share their ideas and experiences and to learn more about the iSchools. With a theme of iSociety: research, education, engagement, we have designed a program that includes something for everyone.

In addition to a great program, there will be networking opportunities giving you time to catch up with old friends and to make new ones. Be sure to take time to visit Chapel Hill, or as it’s known here, “the southern part of heaven.”

This year’s Planning Committee, a dedicated group of volunteers (see the list on page 11), devoted substantial efforts to ensuring the 161 submissions received were reviewed in a short timeframe. Spending hours over the holidays and developing a rich and informative conference program has not been an easy task. I want to offer my deep gratitude to the Committee, to all who submitted proposals and to reviewers, all of whom have contributed to what we know will be a successful 2009 iConference.

Sincerest thanks to all!

Dean, School of Information and Library Science
University of North Carolina at Chapel Hill

Mark your calendars for iConference 2010!

February 3 - 6, 2010
Hosted by the University of Illinois, Urbana-Champaign
Watch the iSchools Web site for more information: www.ischools.org/
12:00 – 5:00 pm  Doctoral Colloquium
Supported by the National Science Foundation
Redbud Conference Room
Session Chair: Jeffrey Pomerantz

The Colloquium will bring together a selected group of outstanding doctoral students (with iSchool-type interests but not necessarily in a school that is a member of the iSchool Caucus) for a workshop with faculty. The Colloquium will provide doctoral students with the opportunity to present their work to senior faculty in a setting that is relatively informal but that allows for the fullest of intellectual exchanges. Students will receive feedback on their dissertation and/or current research from participating faculty and from students’ peers.

12:00 – 5:00 pm  Junior Faculty Mentoring Session
Dogwood Conference Room  Fee: $50 includes lunch
Session Chairs: Peter Bloniarz and Eileen Trauth

The aim of this session is to create a forum for informal dialogue, guidance, and insights about the emerging intellectual communities in the iSchools and similar programs, and to connect junior faculty with their peers and senior faculty within and across their research territories.

Mentors include:

- Nick Belkin, Rutgers University
- Peter Bloniarz, University at Albany/State University of New York
- Karen Fisher, University of Washington
- Martha A. Garcia-Murillo, Syracuse University
- Joanne Gard Marshall, University of North Carolina at Chapel Hill
- Anne Gilliland, University of California, Los Angeles
- Jane Greenberg, University of North Carolina at Chapel Hill
- José-Marie Griffiths, University of North Carolina at Chapel Hill
- Caroline Haythomthwaite, University of Illinois, Urbana-Champaign
- Barbara Moran, University of North Carolina at Chapel Hill
- Jenny Preece, University of Maryland
- Howard Rosenbaum, Indiana University
- Eileen Trauth, Penn State University
- Ping Zhang, Syracuse University
Monday, February 9th

8:00 am  Registration Opens
Participants will pick up their conference packets, final agenda, and name badges.

Biomedical Informatics: Emerging Issues in Education and Research
*Sponsored by the National Science Foundation*
:: Azalea Conference Room :: By invitation.

*Javed Mostafa & Julia Kampov-Polevoi, University of North Carolina at Chapel Hill*

The “Biomedical Informatics: Emerging Issues in Education and Research” is a workshop that will focus on the area of biomedical informatics education and research as a follow-up to a previous workshop held December 4-5, 2007. The previous workshop concentrated on emerging research areas in biomedical informatics, particularly on barriers to accessing medical records and means for leveraging information in medical records for research purposes. The workshop drew participants from academic and industrial institutions and generated several new directions requiring further attention and development. This workshop will concentrate on some of these new directions. It will investigate the development of educational and research programs, and it will focus on current capacities in biomedical informatics programs.

Wednesday, February 11th

The Science of Socio-Technical Systems in iSchools
:: Sunflower Conference Room :: *Fee $50

*Workshop Organizers:*

*Sean P. Goggins, University of Missouri*
*Ingbert Floyd, University of Illinois, Urbana-Champaign*
*Jonathan Grudin, Microsoft Corporation*
*Steve Sawyer, Syracuse University*
*Ingrid Erickson, Social Science Research Council*
*Laura Dabbish, Carnegie Mellon University*
*Madhu Reddy, Penn State*
*David Ribes, Georgetown*

This workshop builds on and extends an effort begun in 2005 that led to the 2008 Summer Research Institute of the Consortium for the Science of Socio-Technical Systems (CSST). This Research Institute, supported by the National Science Foundation and held at the University of Michigan, brought together a diverse set of researchers, including the fields of science and technology studies, human-computer interaction, management and organizational studies, library and information science, sociology, social informatics and computer science, to begin exploring and framing a future research agenda centered on socio-technical research. “The Science of Socio-Technical Systems in iSchools” workshop will involve iSchool faculty and students who will be invited to join the emerging CSST network and work to tailor its broad goals to both reflect and support the research being pursued within the greater iSchool community. We see this workshop as continuing and expanding on the 2008 Summer Research Institute.

*The $50 workshop fee is applicable for conference attendees only. Those not registered for the iConference will be charged a fee of $100 to attend the workshop.*

PAPER SESSION #1
Information Sharing

Monday, 11:00 - 12:30 pm
Location: Redbud
Local-Global: Reconciling Mismatched Ontologies in Development Information Systems
Ramesh Srinivasan, Jessica Wallack - rsrnrin@gmail.com
University of Illinois, Los Angeles
Topics: e-inclusion in the iSociety: addressing under represented groups; Cultural information systems; Information infrastructure development in the home, in organizations, in communities, in society, globally
Keywords: ontology, information loss, e-governance, community informatics
Information sharing across multiple knowledge systems in a FLOSS community
Paula M. Bach - pbach@ist.psu.edu
Penn State University
Topics: Information infrastructure development in the home, in organizations, in communities, in society, globally
Keywords: User experience design, design, software development, software engineering, communities of practice, boundary objects, open source software, FLOSS, information sharing
Software Informatics?
M. Cameron Jones - mjones2@illinois.edu
University of Illinois, Urbana-Champaign
Topics: Other
Keywords: Software engineering, Social informatics, Bibliometrics, End User Programming, Collaborative Software Development

PAPER SESSION #2
Information Practices

Monday, 1:30 - 3:00 pm
Location: Redbud
A Conceptual Analysis of Disinformation
Don Fallis - fallis@email.arizona.edu
University of Arizona
Topics: Information policy, ethics and law, Preserving digital information and ensuring information quality, security and privacy
Keywords: Accuracy, conceptual analysis, epistemology, information quality, philosophy
