
About the Contributors

SØREN BRIER is Associate Professor in the Philosophy of Information, Cognition and Communication Sciences at Copenhagen Business School. His areas of research include Cybersemiotics: a philosophy of science approach in the understanding of information, cognition and communication processes and their relation to the design of information systems and technology second order cybernetics and biosemiotics as epistemological strategies; developing transdisciplinary models of scientific and non-scientific knowledge systems to develop a frame for interdisciplinary co-work and a new understanding of the scientific endeavour and its role in culture and society; and science popularization and science in the media in the knowledge society.

JOHN M. BUDD is a Professor in the School of Information Science and Learning Technologies of the University of Missouri-Columbia. He has previously taught in the Library and Information Science programs of Louisiana State University and the University of Arizona. He has written several works on philosophical aspects of library and information science, including his most recent book, *Knowledge and Knowing in Library and Information Science* (Scarecrow Press, 2001).

CHARLES COLE is a Research Associate in the Graduate School of Library and Information Studies, McGill University, Montreal, Quebec, Canada. Is currently working on a Social Science and Humanities Council of Canada funded research project in devising devices that bridge the gap between the mental model of the user of an IR system and visualized forms of controlled vocabulary schemes (syndetic maps). Has published 30 articles in refereed journals, including the *Journal of the American Society for Information Science and Technology*, *Information Processing and Management*, *Library Quarterly* and *Library and Information Science Research*.

IAN CORNELIUS is a Senior Lecturer in the Department of Library and Information Studies in University College Dublin. His main research interests are in Theories of Information, Interpretation in Information Science, and Information Policy. His current teaching includes courses on the intellectual and social context of Information. His published works include *Meaning and Method in Information Studies* (Ablex, 1996), and "Information Theory for Information Science" in *Annual Review of Information Science and Technology* (ARIST), vol. 36, 2002.

RON DAY is an Assistant Professor in the Library and Information Science Program at Wayne State University. He is the author of *The Modern Invention of Information: Discourse, History, and Power* (Southern Illinois UP: 2001) and numerous articles that take theoretical views of information.

DON FALLIS is an Assistant Professor in the School of Information Resources and Library Science at the University of Arizona. He specializes in social epistemology and the philosophy of information. His articles have appeared in the *Journal of Philosophy*, the *Journal of the American Medical Informatics Association*, *Library Quarterly*, and *Philosophical Studies*. He also guest edited an issue of the interdisciplinary journal *Social Epistemology* on "Social Epistemology and Information Science."

LUCIANO FLORIDI is Associate Professor of Logic and Epistemology at the University of Bari, Italy, and Markle Foundation Fellow in Information Policy at the University of Oxford, UK, where he coordinates the Information Ethics Research Group (<http://www.wolfson.ox.ac.uk/~floridi/>). His publications include over thirty articles on the philosophy of computing and information and the *Blackwell Guide to the Philosophy of Computing and Information* (Blackwell, 2003), *Sextus Empiricus* (OUP, 2002) *Philosophy and Computing—An Introduction* (Routledge, 1999) and *Scepticism and the Foundation of Epistemology* (Brill, 1996). He was the consultant editor for the *Iter Italicum* on CD-ROM (1995) and for the *Routledge Encyclopedia of Philosophy* on CD-ROM (1998). He is the founding director of the Italian Web Site for Philosophy (www.swif.it).

BERND FROHMANN is an Associate Professor in the Faculty of Information and Media Studies at The University of Western Ontario in London, Ontario, Canada. His areas of interest and publication include the political economy of information, the philosophy of information, documentation, applications of science studies and Foucauldian discourse analysis to documentation and information science, and information ethics. He was president of the Canadian Association for Information Science in 1997.

JONATHAN FURNER is an Assistant Professor in the Graduate School of Education and Information Studies at the University of California, Los Angeles. His current research interests are the history and philosophy of information studies, and scholarly communication in the humanities; in 2003 he was chair of the American Society for Information Science and Technology's special interest group on the History and Foundations of Information Science.

KEN HEROLD is Director of Library Information Systems for Burke Library at Hamilton College in upstate New York. He has specialized in law and technology in libraries and has active memberships in ASIST and IFLA. In 2002, he was appointed as a Correspondent to Oxford University Computing Laboratory's Information Ethics Group. He recently began publishing his research in the philosophy of librarianship and information.

BIRGER HJØRLAND is Professor in Information Science at the Royal School of Library and Information Science in Copenhagen, Denmark. He has taught the History and Philosophy of Psychology at the University of Copenhagen and also taught Information Retrieval in the Institute of Applied and Mathematical Linguistics in Copenhagen. While Professor Hjørland's experience is in the field of psychology, his work is influenced and oriented by philosophy and sociology. Since the early 1990's he has been developing a socio-cognitive perspective for information studies, called *Domain Analysis*, and has published extensively on this matter.

ELIN K. JACOB is an Associate Professor in the School of Library and Information Science at Indiana University–Bloomington where she teaches in the area of the representation and organization of knowledge, including indexing, subject access systems, information architecture, metadata and ontologies. She has published numerous articles dealing with the theory of classification and the sociocognitive aspects of systems for representing and organizing resources.

JACK MILLS is Editor of the Bliss Bibliographic Classification. For many years before his retirement he taught and researched classification and indexing, mainly at the School of Librarianship & Information Studies, The Polytechnic of North London. He is the author of many books and articles on classification and indexing for retrieval and was a founder-member of the (British) Classification Research Group.

HOPE A. OLSON is Professor in the School of Information Studies at the University of Wisconsin Milwaukee. Her teaching is in the area of organization of information, including cataloging, classification, and indexing, and

issues relating to gender, diversity, and globalization. Dr. Olson's research addresses problems of bias in subject access to information and in classification in general using feminist poststructural and postcolonial theory. Her current research, funded by a grant from the Social Sciences and Humanities Research Council of Canada, concerns the cultural specificity of conventional classification. She has published in both scholarly and professional journals and has three books: *The Power to Name: Locating the limits of subject representation in libraries* (Kluwer Academic, 2002); as editor in *Information Resources in Women's Studies and Feminism* (K.G. Saur, 2002); and *Subject Analysis in Online Catalogs* 2nd ed., with John J. Boll (Libraries Unlimited, 2001). She is Editor-in-Chief of *Knowledge Organization*—the official quarterly journal of the International Society for Knowledge Organization.

STEPHEN PALING is Assistant Professor in the Department of Library and Information Studies in the School of Informatics at SUNY-Buffalo. His research interests include social aspects of the organization, publication, and retrieval of information. He has a B.A. from the University of New Hampshire in Philosophy and English, an M.S. in Library and Information Science from Simmons College, and is currently finishing his Ph.D. in Information Transfer in the School of Information Studies at Syracuse University.

AMANDA SPINK is Associate Professor at the School of Information Sciences at the University of Pittsburgh. Her research focuses on theoretical and applied studies of human information behavior and interactive information retrieval, including Web and digital libraries studies, and information science theory. She has published over 180 journal articles, refereed conference papers and book chapters.

ELAINE SVENONIUS, Professor Emeritus, taught in the UCLA Graduate School of Library and Information Science, University of California Los Angeles, from 1983 until 1994. Her research has focused on the design of organizing systems in the latter part of the twentieth century, a period that has witnessed upheavals brought about by the computer revolution, the introduction of scientific methodologies and the pressures to globalize information access. Her book *The Intellectual Foundations of Information Organization* was published by MIT in 2000.

TORKILD HELLEFSEN, bio: Born 1969, Librarian DB 1996, MLIS 1998, Ph.d. 2003 (Human Centred Informatics) Assistant professor, Aalborg University, Department of Communication. Research areas: Pragmatic Semiotics, C. S. Peirce, Pragmatism, Terminology, Knowledge Organisation, Knowledge management.

Erratum: The author affiliation for Adrienne Franco in *Library Trends* vol. 52, no. 2 incorrectly listed the Iona College location as “New Rochester.” The location is New Rochelle.
