Croal, N'gai. "Why Rockstar is the Leader of the Pack." Newsweek 7 Nov. 2005: 70-71. EBSCO. 10 Feb. 2006 <[Http://weblinks1.epnet.comweblinks1.epnet.com](http://weblinks1.epnet.comweblinks1.epnet.com)>.

This article discusses a brand that is one of the top maker of video games in a certain gaming system. I believe this article will help me in writing my paper in finding out why this company is doing so well. I can figure out what they do to make games good. It will help me to discover what exactly it is that draws these games to certain games over others.

Dipert, Brian. "Got Game?" EDN: 51-60. EBSCO. 9 Feb. 2006 <[Http://weblinks1.epnet.com](http://weblinks1.epnet.com)>.

This article addresses all the different types of gaming systems and how competitive that world is. It tells how each system is constantly coming out with a new form to keep in competition with the other brands. This article can help me to determine what type of features each system has in comparison to the others and why my gamers prefer the system they do.

Rockwell, Mark. "Sony's PSP: A Competitive Threat?" Wireless Week 15 Mar. 2005: 25. EBSCO. 9 Feb. 2006 <[Http://weblinks1.epnet.com](http://weblinks1.epnet.com)>.

This is perhaps the article that deals the most with the latest technology. It tells about the newest handheld gaming systems and how the graphics and possibilities are become greater as time passes. This article will be extremely useful to me, just to provide more of a basis of knowledge. I learned large amounts of new information in reading this article than I knew previously. It also speaks of how all the extra features these new handheld devices have that they are becoming a threat to other companies producing those products.

"Sony's PSP." Computer Gaming World Sept. 2005: 24. EBSCO. 10 Feb. 2006 <[Http://weblinks1.epnet.com](http://weblinks1.epnet.com)>.

This article is much like the one before, it tells me about the psp in general instead of comparing it to how it's threatening to other products. It is informative of all the functions and capabilities. Once again this is useful to gain a better basis of knowledge of just how technologically advance this field has truly become.
