As this committee stated in its report for 1938-39, further action was delayed until the results of investigations of book reviews in a number of subjects were completed at Columbia. We have insisted from the first that no valid conclusions could be drawn without a thorough investigation of the situation in the various fields. So far only five subjects have been covered in the Columbia studies, which rate the book reviews in four or five professional journals in each field over a period of one or two years according to certain criteria, and determine the time lag between the publication of a book and the appearance of a review.

Useful as these studies are in any consideration of the desirability of a new book-reviewing medium, it is obvious that results of examination of the situation in five fields are insufficient to validate conclusions regarding the whole field of knowledge in general. Moreover, there are indications of improvement in some sections, instigated and carried out by specialists in those fields.

Dr. Carl White has summed up the situation for the committee as follows:

1. We seem limited by a circle which is difficult to break. On the one hand, the task is one which ought to be handled jointly by librarians and scholars in subject fields, and this could best be done by representatives of various professional organizations, including the American Library Association. The desirability of such joint action was pointed out in New York back in 1937 and the reason why a committee was not set up representing the interests of those outside the library field was due presumably to the fact that some spade work needs to be done before other learned bodies could be interested. The circle, in other words, is this: The work that seems to need doing requires joint action, and the joint action seems to await doing enough preliminary work to show that the need is real, not fancied.

2. The preliminary work that needed to be done when we began was, as we recognized in the beginning, too much for the committee working alone. We have needed facts, not theories. Since we, ourselves, could not do the work and since we have, of course, had no money with which to employ assistance or to provide fellowships, we have had to depend on chance studies at Columbia and Chicago. These have been helpful, but they have not enabled us to turn in at the end of the year very impressive evidence of progress.

3. In the meantime, progress is being made which tends gradually to remedy the situation and, as further progress is made, a frontal attack upon the whole field of learning becomes progressively more questionable. Every time a new field succeeds in improving its current bibliographical facilities, the difficulty of thinking of a current service covering all fields becomes progressively more grandiose. We have concluded that the best approach is to work with existing reviewing and abstracting organs, to eliminate duplication where possible, and to encourage new efforts where necessary, but to discard the notion of an organ which would serve a whole block of subjects such as the humanities or the social sciences.

It has been interesting to have the validity of the idea with which we have been grappling as best we can confirmed by the independent efforts of scholars in subject fields. One of the most interesting examples of the way in which the idea has taken hold in other places is illustrated by the report which Mr. McMurtrie made in 1939 to the chairman of the committee on historical source materials of the American Historical Association. The report is called, "A Suggested Program for Augmenting Materials for Research in American Libraries." After speaking of the desirability of preparing subject bibliographies, he goes on to say: "Subject bibliographies, once prepared, will give us a conspectus of the printed materials available at the date of their compilation. What about the material from then on?"

"It should be obvious, but perhaps is not, that every field of serious scholarship needs
a current abstract catalogue of its materials in all languages...

There is no doubt about it: someone is working on the very problem with which we ourselves have been concerned. We are, therefore, more than willing for such groups as the American Historical Association to take the lead. They have better entree to research ability and to money for financing new undertakings than we.

All of these comments seem to point in about the same direction. One of the most valuable forms of service librarians can give the world of learning is to assist in providing bibliographical tools and one of the greatest bibliographical needs has been that of providing current information about learned books in various subject fields. As slow as our committee is obliged to be with our facilities for research, and in view of the interest apparently gradually increasing on the part of scholars in themselves making provision for up-to-date bibliographies, we believe it would be better for us to defer to them.

The committee therefore asks to be dismissed.

SAMUEL W. MCAULISTER
CARL M. WHITE
EFFIE A. KEITH, Chairman

At the Cincinnati meeting of the American Library Association its Council authorized the substitution of College and Research Libraries for the A.L.A. Handbook and Proceedings. This action was taken upon the recommendation of a special committee, Matthew S. Dudgeon, chairman, appointed to investigate the question. The Council approved this plan for an experimental two-year period beginning January 1, 1941.

Under this plan A.L.A. members paying fees of $5 to $10, i.e., Classes D-G, can substitute College and Research Libraries for the A.L.A. Handbook and Proceedings on their regular membership. Class A members will receive the A.L.A. Bulletin on their regular $2 membership and can receive College and Research Libraries by paying an additional $2.

This action on the part of the Council should be of considerable interest to librarians who are employed in college, university and large reference libraries for it will mean that they can now receive their special professional journal on their regular A.L.A. membership as a substitute for the Handbook and Proceedings. Moreover, the same substitution is open to institutional membership in the A.L.A.—A. F. K.

Junior College Library Section to Assist Commission on Junior College Terminal Education

A committee of the American Library Association and the Association of College and Reference Libraries is to cooperate with the Commission on Junior College Terminal Education in studying the library problems involved in semiprofessional, vocational, and general education on the junior college level, has been announced by Carl H. Milam as Executive Secretary of the American Library Association.

Foster E. Mohrhardt of the Washington and Lee University Library is chairman of the committee. Other members are as follows: Lois E. Engleman, Frances Shimer Junior College Library, Mt. Carroll, Ill.; Martha Gladys Johnson, Mars Hill College Library, Mars Hill, N.C.; Wave L. Noggle, Virginia Junior College Library, Virginia, Minn.; Helen F. Pierce, Modesto Junior College Library, Modesto, Calif.

The specific objective of the committee will be to develop a supplementary list of books desirable for junior college libraries in the field of terminal education. Mr.

74 COLLEGE AND RESEARCH LIBRARIES
Mohrhardt, chairman, was editor of *A List of Books for Junior College Libraries* published by the American Library Association in 1937. A supplementary compilation is desired to extend this list, especially in the direction of vocational and semiprofessional education.

The Commission on Junior College Terminal Education is a subsidiary of the American Association of Junior Colleges.

The Hayes Memorial Library

(Continued from page 59)

consideration a project to put on film bibliographies that have proved uneconomical to publish in the usual way. Many of these are in the hands of individual compilers, institutions, societies, and such agencies as the Historical Records Survey. Only those in the field of American history will be considered, and the work could only be done on the understanding that the films would be made available to libraries and scholars, generally on the basis either of loan or sale. Suggestions and comments on the project are earnestly invited.

The Hopkins Transportation Library

(Continued from page 62)

In 1870 the Board of Immigration of Iowa issued *Iowa, die Heimath für Einwanderer*. This was also published in English and Dutch. In the Stanford copy of the German edition is laid a leaf addressed (in German) to all Germans who wish to come to America, and signed by Ebenezer Cook, vice-president and land-commissioner of the Chicago, Rock Island and Pacific railroad. On the recto of this leaf is a map showing the route from Chicago to Council Bluffs.

Probably the most outstanding item of the Pacific railroads material is the report of the chief engineer, William J. Lewis, of the Pacific and Atlantic railroad company dated December 13, 1851. This report is accompanied by a folded map of the route between San Francisco and San Jose as located by Mr. Lewis, September-November, 1851.

There are also extensive manuscript correspondence files of Mark Hopkins dating from 1863-1885 dealing with the Central Pacific, Western Pacific, and Southern Pacific railroads in matters of construction and administration. These include a large file of letters from Collis P. Huntington.

The comment may be made that emphasis has been placed on the earlier literature. It is true that the demand is more likely to come for contemporary material, but the historical background must not be neglected.

That there is interest in historical material is shown in Mr. Thomas R. Thomson's *Check List of American Publications on Railroads before 1841*, galley sets of which several university and private libraries received for checking. It is to be hoped that the publication of this will prompt the compilation of similar check lists on canals, bridges, roads, etc.

*DECEMBER, 1940*
Current Reference Aids

Compiled by the Subcommittee on Current Reference Aids of the Association of College and Reference Libraries, covering the quarter, July 1—September 30, 1940, plus a few books published earlier this year. Titles are arranged by broad D.C. classification, with citations to reviews and annotations in many instances. The committee: Louis Shores, Chairman; Frances Neel Cheney, secretary; Etheldred Abbot; Mabel L. Conat; Judith W. Hunt; Louis Kaplan; Charles F. McCombs; Robert Orr; James T. Rubey; Harold Russell; Anne M. Smith. Please address all communications to Louis Shores, Peabody Library School, Nashville, Tenn.

010 (General only, including periodical indexes)

100 Philosophy

300 Social Sciences

Arranged by kind of service offered rather than by department.

Wissler, Clark. Indians of the United States, Four Centuries of Their History and Culture. Doubleday, Doran, 1940. 319p. $3.75. (American Museum of Natural History Science series Vol. 1.)

330 Economics
Stein, Emanuel, and Davis, Jerome, eds. Labor Problems in America. Farrar and Rinehart, 1940. 909p. $3.50.
Booklist 36:377, June 1, 1940.
Survey intended primarily for students. Many tables and charts.

340 Law

350 Military Affairs

370 Education
Canton Rosado, Francisco. La Instruccion Publica en Yucatan Desde la Independencia Hasta el Fin del Siglo XIX. Compania Tipografica Yucateca, 1940. 299.

391 Costume
Cordy, D. B., and Cordy, D. M. Costumes and Textiles of the Aztec Indians of the Cuetazan Region. Puebla, Mexico. Southwest Museum, Los Angeles, 1940. 60p. $1. (Southwest Museum Papers. no. 14.)

500 Science

Handy book of 48,000 entries. Author states that it is the first of its kind.

The most complete and authoritative discussion of stellar masses and dynamical parallaxes now extant. It should be a standard reference for all students of these subjects.

510 Mathematics
The bulk of the bibliography deals with textbooks, but journals, printed lists, college theses, books of

DECEMBER, 1940
surveying, navigation and biographies of mathematicians are also included. Title-pages reproduced in facsimile as illustrative material. Entries arranged chronologically.

530 Physical Sciences

This laboratory manual covers every phase of work in general chemistry. The lecture demonstrator given full instructions for more than 1000 experiments grouped under topical headings. Detailed instructions include class handling of experiments for large groups.

First volume covers principles and use of microscopes and accessories, also, the physical methods for the study of chemical problems. Second volume treats chemical methods and inorganic qualitative analysis. Detail full enough to guide experienced analyst interested in micro procedure. References to original sources.

Critical review of the physical constants of all classes of pure hydrocarbons to be followed by two others. Much new information to the advanced chemist. Source literature fully listed.

Min. & Met. 21:8, Aug. 1940.

Follows previous edition in presenting the classification and development of ore deposits, but geologic setting and structural control of mineral deposits is emphasized. Entirely rewritten and reset.

Chem. & Met. 47:202, Mar. 1940.

Numerous corrections and new results added to this edition. Spot tests given for the identification of hundreds of organic and inorganic compounds. British spelling used by the translator may be unfamiliar but book is important to laboratories.

25,000 geological and related terms representing fifteen years of research. Major portion consists of words in actual use but special attention given to local expressions in many parts of the world. German-English section includes technical as well as common phrases.

Slightly enlarged from its previous edition but retains all the popular features of the original work. Brought up-to-date and several entirely new items of information added. Large number of tabulations now included dealing with production and imports of the widely used chemical commodities by various countries. Frontispiece has a table of chemical elements with details of their symbols, atomic weights, etc.

78

COLLEGE AND RESEARCH LIBRARIES
The tables of atomic weights have been extensively revised. New tables added and the entire volume brought up-to-date.

New material of a less theoretical nature added and some of the old rearranged. Less important problems from the previous ed. omitted and others added.

Massachusetts Institute of Technology. Spectroscopy Laboratory. Wave Length Tables with Intensities in Arc, Spark or Discharge Tube of more than 100,000 Spectrum Lines . . . Wiley, 1939. 429p. $15.

Of value to students interested in both the pure and applied fields of spectroscopy.

Mellon, Melvin G. Chemical Publications; their nature and use. 2d ed. McGraw-Hill, 1940. 284p. $2.75. (Int. Chemical Series.)

Survey of all types of available chemical information, where to find them, how to locate and use them, like previous edition. New problems included and lists of periodicals and books added.

Contains information and scientific data on the physical, chemical and medicinal properties and the various uses of drugs and chemicals. Formulas, tables and 5900 descriptions of individual substances.

Miall, Stephen, ed. New Dictionary of Chemistry. Longmans, Green, 1940. 575p. $15 (42s.); (Toronto) $12.50.

Includes brief explanations of terms used in chemistry and chemical engineering, accounts of many chemical substances and operations. Intended to furnish concise information not only to teachers, students, and professional chemists, but also to engineers, druggists, and others.

DECEMBER, 1940

The first really inclusive geological dictionary in English.

Chem. Trade Jl. 106:392, June 21, 1940.

New volume of the latest edition of Thorpe is fulfilling the schedule of one volume a year since 1937. Each article or monograph written by an authority and follows the dictionary form. Covers the field of general chemistry and includes the applications of physical chemistry to industry. Vol. IV contains an outstanding treatise of one hundred pages on explosives, outlining the chemistry, manufacture, properties and testing for military and industrial use. Chemist, specialist, and lay reader will continue to accept it as an outstanding reference work.

570 Biological Sciences

Deam, Charles C. Flora of Indiana. Indiana Dept. of Conservation, Division of Forestry, 1940. 1236p. $3.50.

Notable because of its accuracy. Series of unique distribution maps showing not only location but the time of the occurrence of various seasonal changes.

Makes possible the identification of aquatic plants in sterile as well as in flowering or fruiting condition. Covers region from Minnesota to Missouri and eastward to the Gulf of St. Lawrence and Virginia.

McCoy, Elizabeth. The Anaerobic Bacteria and Their Activities in Nature and Disease; a subject bibliography. Vol. 1. Chronological author index; Vol. 2. Subject index. University of California Press, 1939. 2 vols. $10. Subject index (approximately 120,000 entries) of about 10,500 original journal articles, monographs or other published reports. Covers the years 1816 to 1938.

Muller, H. J. Bibliography on the Genetics of Drosophila. Oliver and Boyd, Edinburgh, 1939. 132p. 5s.

Q. Rev. of Biol. 15:92, Mar. 1940.

Pope, Cliftord H. Turtles of the United States and Canada. Knopf, 1939. 343p. $4.25. Concerns primarily the habits of turtles, but keys and diagnostic descriptions are included so that native and Canadian species may be identified.

Rehder, Alfred. Manual of Cultivated Trees and Herbs Hardy in North America, Exclusive of the Subtropical and Warmer Temperate Regions; 2d ed. rev. and enl. Macmillan, 1940. xxx, 996p. $10.50. A thorough revision of a monumental and useful work. 2,536 species fully described, with about 2,685 varieties; also about 25 genera, 1,400 species and 340 hybrids briefly described. Index contains 14,300 plant names. Author is Curator of the Herbarium, Arnold Arboretum, Harvard University.

Snyder, Emily E. Biology in the Making. McGraw-Hill, 1940. xii, 539p. $2.80. Authoritative introduction to biological science; modern in its style, bibliographies, illustrations, and format. Designed for high-school students, but serves as a reference source for laymen.

600 Useful Arts

Four main divisions: I. Philosophy of definitions; II. Classification and definitions of pulps; III. Classification of waste materials used in the paper and board industries; IV. Definitions of papers, boards, and papermaking terms.

Radiocraft 12:100, Aug. 1940.

Trade nomenclature for the workmen in the field of aeronautics, woodworking, and building trades, electrical . . . metal working, printing, chemistry. Does not include all the technical terms in any field but many of the words listed not found in a technical text nor in the average dictionary.

Ponce de Leon, Nestor. Technological Dictionary, English-Spanish and Spanish-English; or words and terms employed in the applied sciences, industrial arts, fine arts, mechanics, machinery, mines, metallurgy, agriculture, commerce, navigation, manufactures, architecture, civil and military engineering, marine, military art, railroads, telegraphs, etc. 2 vols. in 1. Isaac Mendoza Book Co., 15 Ann St., New York, c1939. 1744p. $15.

Each section of this edition has an 84-page supplement of new material. The author has been a commercial translator for many years and has defined scientific, technical, industrial and business words, terms, and phrases for use in export trade.

Material appeared monthly in Drugs, Oils and Paints, May 1937 through September 1939. Includes definitions of trade names and raw materials used in the industry, as well as a glossary of materials and technical devices used in the manufacture of protective and decorative coatings.

610 Medicine

Barr, David P. Modern Medical Therapy in General Practice. William Wood & Co., 1940. 3 vols. $35.

Clinical Abstracts. Vol. 1, 1939-1940. $15 per yr.

Directory of Medical Specialists Certified by American Boards, 1939; Paul Titus, directing editor; published for the Advisory Board for Medical Specialties. Columbia University Press, 1940. 1573p. $5 (buckram).

Bibliography of 1,434 titles.

National Tuberculosis Association. Committee on Medical Research. Tuberculosis; a bibliography of articles published as part of a cooperative investigation between the National Tuberculosis Association, United States Public Health Service, and certain universities and institutions. U. S. Public Health Service, 1939. 52p.

Pearce, Evelyn C. A Short Encyclopedia for Nurses. Dutton, 1939. 686p. $3.50.

620 Engineering

The author spent years of research to assemble the data for the industry's first thesaurus. Information on practically every phase of the aircraft industry. Dictionary section covers in detail the nomenclature for words, phrases and expressions used in aeronautics. Reference guide section contains directory of manufacturers, airports, schools, C.A.A. regulations, weather bureau data, illustrations of flight maneuvers, charts, and tables for design, materials, and mathematics.

Authors have solicited definitions from prominent sources in the engineering fields. Alphabetical arrangement of major portion of the book followed by eight appendices: English-Spanish and Spanish-English words; German-English words; Aeronautical symbols; Symbols for hydraulics, standard classifications of pumps, materials for pumping various liquids; Abbreviations for scientific and engineering terms; Symbols for mechanics, structural engineering and testing materials; Weights and measures, conversion factors, chemical elements, symbols used for radio, etc.

Sat. R. of Lit. 22:11, Sept. 21, 1940.

Handbook to the principal military types of the world with illustrations in color.

Aut. Ind. 83:139, Aug. 1, 1940; Aut. Eng. 30:208, July 1940.

Represents a history of engineering achievement and devotes eighty-odd pages to an account of the engineering contributions of Leonardo da Vinci. Structural and military drawings reproduced from the famous “Note books.”

Reid, Charles T. Un Diccionario de Aeronautica; espanol-ingles, ingles-espanol. Aviation Press, 580 Market St., San Francisco, c1939. 207p. $3. (Cadet series.)

Aero Dig. 35:123, Nov. 1939.

The assistant chief draftsman of the Douglas Aircraft Co., Inc. has compiled these notes for his own use in making English-Spanish translations of sales literature, parts catalogues, maintenance manuals, specifications, etc., in the airplane manufacturing business. Also including terms pertaining to mathematics, chemistry, physics, machinery, mechanical parts, etc. Definitions not exhaustive and have no claim to educational or literary merit. Slang included for its practical value. Tables of aeronautic symbols illustrated with line drawings divide the two sections of the book.

Civil Eng. 19:548, Aug. 1940; Min. & Met. 21:16, Sept. 1940.

Includes tables and a sample set of field notes for students.

630 Agriculture

DECEMBER, 1940

83

700 Visual Arts

Bell, J. Munro. The Furniture Designs of Chippendale, Hepplewhite, and Sheraton. McBride, October, 1940. 300 ill. 460p. $4.50.

Excellent critical survey of architecture. Correlates the culture of the people with the buildings they produced. More illustrations would have enhanced its usefulness. Addition of Pre-Columbian American buildings and Islamic buildings is noteworthy. Bibliography.

Harris, Enriqueta. The Prado; treasure house of the Spanish royal collections. New York Studio, 1940. 136 pl. 84p. $4.50.
Parnassus 12:33, Oct. 1940.
Fine photographs with many details of this extraordinarily important collection.

Covers archaeology as well as art.

New York, Museum of Modern Art. Twenty Centuries of Mexican Art. Museum of Twenty Art, 1940. 199p. ill. $2.75; $1 (paper).

Newcomb, Rexford. Old Kentucky Architecture; colonial, federal, Greek revival, Gothic and other styles erected prior to the War Between the States. William Helburn, Inc., New York, 1940. 130p. $10.
Arch. Forum 73:20, Aug. 1940.
Excellent photographs of exteriors and interiors, plans, and measured drawings with a brief authoritative text. Indispensable book for any library or individual interested in the early architecture of the United States.

Approved by Instructor in Lettering, School of the Art Institute, Chicago.

780 Auditory Arts

Bibliography of "Printed Tudor and Jacobean music and musical treatises," p. 323-47.

Christy, Van A. Glee Club and Chorus; a handbook of organizing, conducting, and maintaining glee club and choral organizations, with selected, graded, and classified lists of octavo music and texts. Schirmer, 1940. iii, 149p. $2.50.
Guide for the inexperienced, as well as experienced, choral director. Includes suggestions for arrangements of radio programs, supplementary music for motion pictures, and references for further study.

Who these pioneers are, how they first invented the famous forms or first brought these forms to general acceptance, how they paved the way for the masters.

Grant, Margaret and Hettinger, Herman S. America's Symphony Orchestras, and How They Are Supported. Norton, 1940. 326p. $3.

Musical appreciation for the layman, including the high points of music history from "music and magic" to swing. Comprehensive index.

Wier, Albert E. The Piano, Its History, Makers, Players and Music. Longmans, Green, 1940. viii, 467p. $3.50.
Special features include: "List of two-piano music"; "Dictionary of pianists"; and "The piano in records."

800 Literature

Holmes, Thomas J. Cotton Mather; a bibliography of his works. Harvard University Press, 1940. 3 vols.
Masterpiece of bibliographical publishing as to care, wealth of notes and to its printed format.

Millett, Fred B. Contemporary American Authors; a critical survey and 219 bibliographies. Harcourt, 1940 (rev. ed.). 716p. $3.75.
History

Canete y Domínguez, Pedro Vincente. Potosí Colonial: Guía Historica, Geográfico, Política, Civil y Legal del Gobierno e Intendencia de la Provincia de Potosí. Imp. Artística, 1939. 207p. (Biblioteca Boliviana, no. 5.)

Finland. Blauweiss-Buch der Finnischen Regierung. Dokumente über die Entwicklung des Finnisch-russischen Konflikts. . . (Übersetzung der Finn. Originalausgang. . . ). Verlag Birkhäuser, 1940. 120p. 2.80 fr. (Swiss) (Dokumente und Urkunden zum Kriegsausbruch, 6.)

Te Velde, Johan C. Modern Latin America: a popular bibliography. Central Y.M.C.A. College, Chicago, 1939. 31p. 10¢. (Good Neighbor Series no. 1.)

Geography and Travel

Philips' International Atlas; a series of 160p. of col. maps and plans . . . with an index of over 65,000 names; revisions to political boundaries up to December 1939. Philip, 1940. 160p. 45s.
in Washington, has under way a nationwide collection of statistics from the libraries of the institutions of higher education. The work is in charge of Ralph N. Dunbar, Chief of the Library Service Division, and is the first comprehensive gathering of data from college and university libraries since 1929.

Montclair, New Jersey, Public Library, Marjorie Quigley, librarian, during the spring months carried on a study of cost accounting for public libraries and, as a basis for this, prepared a test for scoring the reference-department resources of libraries of medium size.

The reference division of the Rochester, New York, Public Library has worked out a simple plan of instruction in library tools for adults. The project was started for the benefit of student hospital nurses who used the general reference division for work on their assignments.

St. John's University Library, Brooklyn, New York, Rev. John W. Dunn, director, has acquired an unusually valuable collection of several thousand volumes giving the history of Ireland. Extensive remodeling of the college buildings will provide space for additional thousands of volumes.

Duke University, Durham; Tulane University, New Orleans; and the University of North Carolina, Chapel Hill, have received a special grant from the Rockefeller Foundation to purchase books dealing with the life and literature of Latin Americans. It was agreed that Duke would take as a special province all Portuguese literature including Brazilian. Tulane University will emphasize the influence of literature of the United States on Hispanic-American literature and the relation of the Spanish and Indian languages. The University of North Carolina will devote special attention to bibliography, folklore, and constitutional history. Under the agreement, Duke will be responsible for the literature of Brazil, Colombia, Bolivia, and Equador; Tulane, for the Central American region and Venezuela; and the University of North Carolina for Argentine, Uruguay, and Paraguay.

A leather dressing prepared by Dr. T. F. Whitehead, professor of chemistry, University of Georgia, Athens, has proved successful in preserving many reference books at the university library.

The papers of Sir Henry Clinton, British Commander-in-Chief in America during the Revolution, now in possession of the William G. Clements Library, Ann Arbor, Michigan, Randolph G. Adams, librarian, are being extensively used by Carl Van Doren in preparation of his book on the treason of Benedict Arnold.

Central College, Pella, Iowa, Mary L. Reed, librarian, is establishing a six-weeks library course required of all new students. Each week for six weeks the freshmen will meet in the library during one of their English periods for instruction in reference material.

A separate English reading room was opened by the University of Iowa Library.
the Field

in September with a collection of five hundred books which are required reading for English majors and honors students.

Thirty-five hundred alumni of the University of Michigan have during the past year received reading lists prepared by the library extension service of the university. There are over six hundred different lists on a wide variety of topics ranging from technical subjects like "Noise Elimination" and the "Technology of Paint and Varnish," to economic and political topics on "Wages," "Unemployment," etc.

Boyce House, Southwest Texas author and poet, has recently given the University of Texas Library, Austin, Donald Coney, librarian, a complete 1939 file of his newspaper column, "I Give You Texas," and the notebook from which he wrote his oil boom story, "Were You in Ranger?"

University of Texas Library, Austin, Donald Coney, librarian, has begun the assembly of a political science library which will include handbills, signs, broadsides, etc., relating to all future election returns in Texas. The collection of political material received its start when samples were collected of publicity devices used by student office seekers in the campus election. University of Texas Library also possesses a 17,000-volume textbook collection including Ray's Arithmetic and McGuffey's Reader. The oldest textbook is a Latin and Greek parody on the Book of Job which was in use in 1637.

Pasadena Public Far West Library has set aside a special section of its reference department for books and pamphlets to be used by the Pasadena Committee on Public Education for National Defense and Welfare.

The following officers have been elected for the Reference Librarians Council of San Francisco Bay region: Miss Josephine Deavitt, Oakland Public Library, president; Miss Anita Levy, San Francisco Public Library, vice president; and Miss Christine Staats, Alameda County Library, secretary.

Julia Stockett, Canada reference librarian, Vancouver, B. C., Library, is in charge of the Vancouver Library Staff Association War Service. This service includes preparing and sending out soldiers' libraries to huts, recreation centers, and outposts.

Miriam Allen, Personnel Denver '39, formerly assistant in the Grinnell College Library, became an assistant in the University of Iowa Library, in the Documents and Order Departments, June 1.

Mrs. Crystal Bailey, Oklahoma, has been placed in charge of the Engineering Reading Room at the Pennsylvania State College.

Helen R. Belknap, Western Reserve '39, became librarian of the University of Iowa Art Library in June, 1940, succeeding Frances Rogers, who resigned to become assistant in the reference department of the Ryerson Library, Art Institute, Chicago.

Katharine Berthold, Columbia, has been appointed acting head of the circulation department, Temple University Library.

DECEMBER, 1940
Harold E. Boisen, assistant librarian, University College, Northwestern University, has been appointed librarian of the George A. Bunting Library, Washington College, Chestertown, Maryland.

Margaret Borg-Breen, Minnesota ’40, has been appointed assistant in the University of Iowa Education Library.

Martha Connor, Drexel, acting head of the catalog department, Temple University Library, has been promoted to be head of the catalog department.

Pauline Cook, Minnesota ’34, formerly reference assistant in the University of Iowa Library, has been appointed librarian of the University of Iowa Foreign Language Library.

John M. Cory, Graduate Library School, University of Chicago, was appointed on September 1, director of libraries at the University of Alabama. Mr. Cory will have charge of the new Gorgas Library Building which was dedicated in May.

Lois Geywitz, Drexel, has been appointed circulation assistant at the Pennsylvania State College Library to succeed Annis Underwood, Simmons, who resigned to be married.

Ralph Hagedorn, Wisconsin ’37, formerly of the staff of the University of Texas Library, Austin, has been appointed assistant in the periodicals department, Temple University Library.

Ruth M. Herrick, Illinois ’40, became circulation assistant at the University of Iowa Library June 1.

David Jolly, Peabody ’37, has been appointed librarian of the University of New Hampshire at Durham.

Margaret Knoll, Pratt Institute, assistant circulation librarian, Pennsylvania State College Library, has been advanced to circulation librarian.

Edmon Low, librarian, Bowling Green University Library, Bowling Green, Ohio, accepted in September the librarianship of Oklahoma Agricultural and Medical College, Stillwater, Oklahoma.

Nicoletta Marketos, Michigan, has resigned as assistant in the catalog department of The University of Michigan Library to become assistant in the catalog department of Temple University Library, Philadelphia.

Katharine Patterson, Columbia, has resigned as head of the circulation department at Temple University, Philadelphia, J. P. Danton, librarian, to be head of the circulation department at Swarthmore College Library, Charles B. Shaw, librarian.

Ruth E. Paul, Illinois ’40, succeeded Sarah F. Cockey as assistant supervisor of the reserve department, University of Iowa Library in June, 1940. Miss Cockey resigned to accept a position in the periodicals department of the University of North Carolina Library, Chapel Hill.

Eugenia Raymond, formerly librarian at Cincinnati Art Museum has been appointed head of the fine arts division of the Seattle Public Library.

Mary Reed, Columbia, was appointed September 1 as librarian at Central College, Pella, Iowa.

Donald O. Rod, assistant in the catalog division of University of Michigan Libraries at Ann Arbor, has been appointed assistant librarian and head cataloger of Luther College Library, Decorah, Iowa.

A revival of Roopa-Lekha which ceased publication in 1934. Beautiful format with many full-page colored illustrations.

Rutgers University Studies in Philosophy. New Brunswick. No. 1, 1940.—W.E.W.

Abstracts of theses as a part of graduate work.

"Sustancia will treat, preferably, themes relating to literature, art and philosophy." . . . Scholarly publication. Contains signed book reviews.
Lucile L. Keck calls attention to the following publications in the field of public administration and personnel work that are significant from the standpoint of the direction of large libraries because they develop or embody guiding principles of administration.

These short accounts of various administrative problems and decisions are intended to promote the development of a true science of administration. Their immediate practical use is that they furnish active administrators with descriptions and analyses of many problems basically similar to their own. The reports are classified under such headings as Organization, Personnel, Finance, and Office Practice. The Committee on Public Administration has invited the contribution of further reports such as these already printed, in order to build up an organized body of knowledge in the administrative field.

American Municipal Association and the Civil Service Assembly of the United States and Canada. Emergency Personnel Policies; a check list of Items Which Might Be Considered by State and Local Governments. 1313 East 60th Street, Chicago, 1940. 10p. 25¢.

An outline of the personnel problems most likely to arise in public agencies as a result of the current defense program. Many of the suggestions will apply to libraries and similar institutions.

A statement of the essential features of a program of personnel administration. This article, although written primarily for the public personnel official, is general enough to be highly suggestive to the administrators of libraries and similar institutions.

Woolpert, Elton D. Municipal Public Relations; a Suggested Program for Improving Relations with the Public. International City Managers' Association, 1313 East 60th Street, Chicago, 1940. 50p. $1.

A series of essays on various aspects of the public relations of local governments. Most of the author's comments are general enough to apply to libraries, which occasionally receive specific treatment.

An application of psychology to problems of managing, training, and stimulating workers. The worker's approach is
intended to enable the practical administrator to apply new concepts of psychology to practical affairs.

A pioneer study in the field of municipal cost accounting, applying the principles of cost accounting, which have heretofore been used primarily by business corporations, to public institutions.

Municipal Finance Officers Association of the United States and Canada. Proceedings of the Conference on Retirement Administration, April 26 and 27, 1940... Chicago, Illinois. 1313 East 60th Street, Chicago, 1940. 25p. 50¢. (Mimeographed)

The report of a series of discussions on various aspects of the administration of retirement plans. The discussions brought forth a great deal of practical information and advice on these problems.

A survey of recent changes in systems of personnel relations in a group of banks. The various aspects of personnel policies discussed may be of interest to librarians.
Readings in Business Administration

MARIAN C. MANLEY contributes the following annotated list of articles in the field of business administration which have special application to administrative problems of large libraries.

**Magazine Articles**

A detailed analysis of salaries paid according to their range and to the percentage of all executives in certain salary groups. Covers department heads from general sales managers to office managers and factory superintendents.

While primarily a consideration of plant employee rating, attention is paid to ramifications involving executive and clerical application, with due regard to the dangers and limitations unavoidable in any rating procedure.

Conclusions based on nation-wide survey carried on by the 1940 class in personnel management of the University of Toledo, showing effect of unionism on labor turnover, length of training period, devices used for selections, etc. Includes summary of data and its detailed discussion.

Enlightening discussion of steps to be taken in applying research to management problems as acute in library administration as in industrial and commercial fields.

Practical and pertinent analysis of the dangers of the undue pressure to which many executives subject themselves.

**Books**

Two loose-leaf volumes that contain outlines and suggestive methods for developing conferences of department heads on management problems. The supplementary text brings out many important features. The content, while intended for business and industrial problems, relates directly to library administrative problems. The treatment tends to stimulate analysis and evaluation of factors involved in management problems such as supervising controls, training devices, promotion and compensation, the search for executive ability, etc.

Some twenty years old but still one of the sanest, most practical and suggestive treatments of self-development for efficient executive methods. A book requiring judicious skimming and thoughtful attention in about equal proportions.
