LIST OF FRUITS RECOMMENDED FOR A FARMER’S GARDEN OF ONE ACRE IN NORTHERN ILLINOIS.

APPLIES.—16 Trees.

Early Summer:
   2 Duchess.—Pale yellow, striped with red; one of the best cooking varieties; season, middle to last of July.
   1 Benoni.—A few days later than Duchess; yellow, nearly covered with a dark, rich red; a good cooking and eating apple; keeps well when stored.

Early Fall:
   2 Wolf River.—Very large; yellow, striped with red; a good cooking apple; season, first of September.

Late Fall:
   2 Fameuse.—Dark red on greenish yellow; flesh white, very tender, good eating; keeps well until middle of December.

Early Winter:
   2 Jonathan.—Red over yellow; one of the best eating and cooking apples; keeps well until the middle of January.
   2 Grimes Golden.—Yellow; probably the best eating apple grown in Illinois, also a good cooking sort; keeps well until Christmas.
### Late Winter:

3 **Minkler**.—Dark red over greenish yellow ground; flavor very rich; a good eating apple; medium to large; keeps well until late winter.

2 **Willowtwig**.—Medium to large; dull red on greenish yellow ground; a good eating apple if kept until spring.

### Summer:

2 **Bloodgood**.—Yellow, somewhat russeted; on account of its fine flavor and earliness is valuable for table use; season, last of July.

### Early Fall:

2 **Flemish Beauty**.—Large; yellow, partly covered with marblings of russet; a good eating and cooking pear; season, first of September.

1 **Seckel**.—Small; dark brown, usually covered with russet; very sweet, rich in flavor; is said to be the best eating pear grown; season, middle to last of September.

### Late Fall:

2 **Angouleme**.—Large; green, with large specks and dots of russet; good quality; keeps well; good for both cooking and eating; season, last of October.

1 **Keiffer**.—Medium to large; yellow with a reddish-brown cheek; very productive; usually used for canning.

### Early:

3 **Champion**.—White; very juicy, sweet; one of the best early sorts for table and canning; season, middle to last of August.

### Late:

4 **Elberta**.—Large yellow peach with red cheek; good quality; good for eating or canning.

### Plums:

2 **Lombard**.—Medium to large; violet purple, with blue bloom; yellow flesh; good quality; season, first of August.
2 Damson.—Small; dark purple, with blue bloom; yellow flesh; rather acid; good quality; season, September.

2 De Soto.—Rather small; red; fairly good quality; good for canning.

1 Wild Goose.—Rather small; yellow, nearly covered with red; juicy and sweet; season, July.

CHERRIES.—8 Trees

4 Early Richmond.—Dark red; very juicy; acid; one of the best cooking sorts; very productive; season, middle of June.

2 Montmorency.—Dark red; larger than Richmond, a little darker in color; very productive; season, last of June.

2 English Morello.—Very dark red; juicy, acid; nearly as large as Montmorency; season, August.

BLACKBERRIES.—66 Plants.

44 Snyder.—Medium size; very prolific; good quality; sweet; firm; good for table or canning.

22 Ancient Briton.—A later variety than Snyder, and will average a little larger; rather acid; good quality.

BLACK RASPBERRIES.—64 Plants.

32 Kansas.—Very prolific; good quality; firm; holds up well during season.

32 Gregg.—Large; late; good quality; firm.

RED RASPBERRIES.—32 Plants.

32 Cuthbert.—Large; conical; firm; good quality; plant or vigorous.

32 Loudon.—Large; nearly round; good quality; a little later than Cuthbert.

GRAPES.—16 Vines.

3 Moore’s Early.—Black; one of the best early grapes; good quality; a good table grape.
3 Worden.—Black; cluster large; berries large; sweet; fine quality; good for eating; several days later than Moore's Early.

3 Concord.—Black; about ten days later than Worden; one of the best known varieties of grapes; very hardy and productive.

4 Woodruff Red.—Large; red; fine quality; sweet; ripens about with Concord.

3 Niagara.—Large clusters; greenish white, with a whitish bloom; good quality; ripens about with Concord.

GOOSEBERRIES.—20 Plants.

Downing.—Medium size; green; very productive; good quality; nearly free from mildew.

CURRANTS.—44 Plants.

32 Red Dutch.—A strong growing plant; clusters long; berries large; good quality.

12 White Grape.—A good grower; clusters large; berries large; good quality; probably the best white sort.

STRAWBERRIES.—250 Plants.

50 Brandywine (Per.).—Dark crimson; very productive; large; good quality; firm.

50 Wolverton (Per.).—Large; scarlet; productive; firm; good quality.

50 Haverland (Imp.).—Large; light scarlet; good quality; ripens with Brandywine; productive.

50 Senator Dunlap (Per.).—A good grower; medium size; ripens early; dark red; flesh firm.

50 McKinley (Per.).—Large; good quality; productive; holds up well through season; firm.

W. S. Hotchkiss.
