The Library of Congress Catalog and Supplement:

Main Catalog—167 vols. Issued to July 31, 1942 (Approx. 108,000 p.) Price net $750.00.

The Library of Congress Catalog was published as an important bibliographical tool for the large research libraries. As such and as a practical cataloging tool, it has paid its original cost many times over in most larger institutions by the economies it makes possible. Many small institutions without graduate programs or large book budgets are purchasing the Catalog as a cataloguers' tool as well as an important reference work. In some instances, this expensive purchase has been recommended to presidents of small colleges by nationally known library consultants as a practical economy.

The British Museum Catalog and Supplement:

Main Catalog—58 vols., 1881-1900 (Approx. 53,000 p.) Price net $500.00.

Supplement—10 vols., 1900-1905 (Approx. 8,000 p.) Price net $130.00.

Next to the Library of Congress Catalog, many consider this the most important single general bibliographical tool for college library purposes. No faculty can afford to get along without ready access to the "B. M. Cat."

Union List of Microfilms:

Revised, enlarged, and accumulated edition, compiled by Philadelphia Bibliographical Center and Union Library Catalogue. Approx. 25,000 entries, 1000 pages. Price net $17.50.
