Rutgers recommends

THE COLLECTED WORKS
OF Abraham Lincoln

Edited by ROY P. BASLER
MARION D. PRATT, LLOYD A. DUNLAP
Assistant editors

"As the definitive edition, it is an absolute necessity in all American history collections and in every well-rounded general collection. It is an expensive set but worth every penny."

Library Journal

"One of the 20th century's truly great contributions to American historical scholarship."

PAUL M. ANGLE, Chicago Tribune

"We have for the first time a truly definitive edition of the writings of our foremost statesman."

DAVID C. MEARNS, New York Times Book Review

"Will henceforth be indispensable to any student of Lincoln, and to any library or institution where the study of him goes on."

MARK VAN DOREN, New York Herald Tribune Books

A SHORT CHRONOLOGY OF AMERICAN HISTORY 1492-1950

BY IRVING S. AND NELL M. KULL

“A much-needed volume giving some 10,000 events in American political, social, economic and cultural history, from Columbus to Korea. A reference book which every student of American history will be grateful for... recommended.”

Library Journal

“It will be the one volume that historians, librarians, and editors will pick up more than any other.”

American Historical Review

406 pages 89 page index $6.50

THE UNITED STATES QUARTERLY BOOK REVIEW

Published for the Library of Congress by Rutgers University Press

From a recent questionnaire concerning the Book Review

“The most satisfactory of all book review mediums.”

“[Its] reviews are often the deciding factor for books on which we have withheld selection.”

“An extremely satisfactory publication, particularly because it is non-commercial, non-coterie, non-political.”

$3.75 a year

for fast, high quality developing . . . the NIKOR Film Processing Machine

An adaptation of the well-known Nikor stainless steel developing tanks, this precision equipment will develop and dry motion picture film without removing it from the reel.

They are used in many places where immediate and private processing of high quality is desired.

Set includes loading stand (illustrated), reel, and three nesting tanks with built-in agitator, for developing, washing and fixing.

- Made in sizes to accommodate 28, 50 or 100 foot lengths of 35 mm. or 70 mm. film.
- Stainless steel tanks and reel
- Sturdy but light-weight construction
- Easily operated

for steel stacks

it's Hamilton

Absolutely new—

Hamilton Compo Stacks

Only Hamilton offers the Compo Stack, an entirely new type of book housing which utilizes a smooth operating drawer-type shelf in place of stationary shelves. This ingenious equipment greatly increases stack capacity and utility, makes possible entirely new efficiencies in library operation. Be sure to get further information on Hamilton Compo Stacks.

Functional smartness—

Hamilton Continuous Upright Stacks

Hamilton Continuous Upright Stacks are used in many of the country's finest libraries. All stack compartments accommodate shelves of various depths for greater flexibility. Simple, speedy vertical adjustment of shelves in 1/2" increments insures minimum space waste between shelves, maximum book storage. Closed ends enhance smart, modern appearance.

High on utility—

Hamilton-Standard Stacks

Hamilton-Standard Stacks owe their popularity to a number of unique, patented efficiency features. Shelf depth adjustments, and shelf height adjustments in 1/2" increments can be quickly and easily made. Shelves can be sloped, upward in lower rows, downward in upper rows, to facilitate title scanning. Rounded edges and closed ends eliminate abrasion hazards, create a smart, modern impression.

No matter what your stack problems, no matter what your plans for building or modernizing, you can count on help from Hamilton. Hamilton's engineers have solved hundreds of library planning problems and this fund of experience is available to you through Hamilton's FREE Planning Service. To get further information on any type of Hamilton stacks, or to find out more about Hamilton's FREE Library Planning Service, write today to—
**NOW Library Bureau gives you**

**69% more storage in the same space!**

Here at last is the easy way to provide for future expansion—to get more book storage space with no more floor space.

Both diagrams above represent a room 356 sq. ft. in area. Library Bureau has devised a new four-way stack column, which can be arranged as in “A” (left) for conventional storage, or as in “B” (right), where the same area provides 69% more storage space—and still allows easy access to the shelves. In both arrangements, the same number of columns in the same locations is used.

Furthermore, the change can be made easily. You can convert all or any part of the floor space to compact storage—and change back to conventional storage at will. Compact storage in your present stack area may be possible; we will gladly survey your facilities without obligation.

What a boon for the library which grows faster than funds for a new building! You’ll want full information on this new “compact storage.” Just call the Library Bureau Specialist at your nearest Remington Rand Business Equipment Center, or write to Room 1660, 315 Fourth Avenue, New York 10.
