receives are serial in form, truly a staggering figure. And Charles H. Brown has indicated the prominent role that serials play in the field of science, by his samplings, which show that from 90 to 95 per cent of the bibliographical footnotes in scientific publications refer to articles in serial publications. More than ever, serials can be called the backbone of the research library. Harry Miller Lydenberg was right when he wanted to collect serials and current pamphlets for the New York Public Library, for he knew that out of such publications would come the monographs of the future.

In the comparatively near future we can anticipate the application of television facsimile reproduction machines to library purposes. The research libraries of the country should before too long be linked up in a network of these machines, so the resources of one can without delay be made available for all, and at a reasonable cost. When that day comes there should be a larger measure of bibliographical control over serial publications than we now enjoy, since we can fairly anticipate that the greatest demand will fall on serials. And herein too lies part of the reason for developing the idea of primary bibliographical responsibility in the collecting of serials.

So we can see the ever-increasing significance of the union-list program. In the years that lie ahead, with their emphasis on the cooperative collecting and utilization of serials, we are fortunate in having the enterprise and leadership of the National Library in Washington to guide us. But the Library of Congress needs the full cooperation and support of the contributing libraries, for the burden is very great. We must not rest on our laurels. We must not sit back and say that the back of the union-list problem has been broken, no matter how proud we may be of past accomplishments. As far as the ULS is concerned our philosophy must be that the reward of good work is more work.

**Now Available:**

**ACRL MICROCARD SERIES**

No. 1. Anderson, Yeatman, **Communication Problems of Exhibits and the Application of Modern Museum Techniques to Library Exhibits.** 46 l, 2 cards, $0.50.

No. 2. Kester, Martha. **Stephen A. Douglas: a Bibliographical Study.** 55 l, 2 cards, $0.50.

No. 3. Talmadge, Robert Louis. **Practices and Policies of the Reference Departments of Large University Libraries Concerning the Preparation of Bibliographies.** 65 l, 2 cards, $0.50.

Individual or standing orders should be sent to Margaret K. Toth, Micro-publication Service, University of Rochester Press, Rochester 3, N.Y. Manuscripts to be considered for publication should be sent to Lawrence S. Thompson, chairman of the ACRL Publications Committee, at the University of Kentucky.

**STATE LAWS ON EMPLOYMENT OF WOMEN**

by Dr. Edith L. Fisch, Member of the New York and Federal Bars, and Professor Mortimer D. Schwartz, Law Librarian, University of Oklahoma and Member of the Maine Bar.

390 p. $7.50 1953

A reference guide for lawyers and for all employers of women, this book is a compilation of all state laws affecting the employment of women or intended to provide equality of opportunity and equality of treatment for women in private employment, public employment, self-employment, etc.

An introductory section traces the history of state laws dealing with discrimination against women and with employment of women.

Discontinuance of the Magazine Subject Index and Dramatic Index

The F. W. Faxon Co., Inc. reports with regret that the Magazine Subject Index and the Dramatic Index are discontinued as of 1949, although considerable work has been done on 1950 and 1951. The sole reason is the great price increase which is required by rising labor and printing costs.

The two publications were started in 1907 and 1909 respectively. Faxon hopes that some other organization or individual will be interested in continuing the publications and will offer assistance.

GUIDE TO COLOR PRINTS
by Milton Brooke & Henry J. Dubester
1953 269p. $4.50

This useful book will guide you to more than 5,000 color reproductions of 4,000 paintings by recognized artists. It gives the size of each color print, the price, and the source from which it may be obtained in the United States.

The art critic of the Washington Post says, “This is an invaluable reference book for artists, art teachers, librarians and art lovers.”

A first floor view of the beautiful, new James Wheelock Clark Library at Russell Sage College, Troy, N. Y. In the center, the new Atlas Case and Periodical Index Table, supplied by Library Bureau. The LB tables and chairs at the right are nearly 20 years old, yet they blend perfectly with the finish of the new furniture.

Beauty on a Budget

Most colleges are dollar-counters these days. Russell Sage College had to watch expenses carefully when planning its new library. Here’s how they solved their problem, in the words of Miss Margaret R. Meyer, Librarian:

“In planning for new furniture and equipment, economy was paramount. This problem was immensely simplified because the Library Bureau tables and chairs in the old building were attractively finished. Moreover, all this furniture, some of it twenty years old, was usable; the chairs were in excellent condition, and the tables sound, although tops needed refinishing. The newly purchased equipment has all been supplied in an attractive finish lighter than the old furniture, but blending perfectly.”

Investing in the Future

Library Bureau equipment is built to be both useful and beautiful ten, twenty, even fifty years hence, reducing replacement cost to the vanishing point. And when you expand, Library Bureau can always supply you with furniture that blends perfectly with what you already have. For complete details on Library Bureau quality furniture write for free Catalog LB604.

Main floor and mezzanine are equipped with Art Metal Standard type Bookstacks. (Inset) Mezzanine stacks form series of alcoves in which Carrell Desks are located.

Atlanta's Carnegie Library Equipped with Art Metal Bookstacks

The installation of library bookstacks at Carnegie Library, Atlanta, Georgia, is another example of fine Art Metal Library Equipment. Standard type stacks are used in the main floor reading rooms and on mezzanine floor while stack rooms are equipped with Bracket-type shelves. Numerous Carrell Desks are placed in strategic locations throughout the entire library.

Other outstanding Art Metal Library installations include the Harvey S. Firestone Library at Princeton University, Lamont Library at Harvard University, Duke University, Miami Public Library, Charles Hayden Library at M.I.T. and Fordham Univ. Library. Call upon the Art Metal Library Division for any desired help that can be rendered by our experienced staff of sales engineers. No charge is made for their services in assisting library building committees and their architects in the selection of bookstacks and other library equipment.
