CHEMICAL TITLES

*the express service for increasing "current awareness"
of new chemical research*

• Starting in January 1961, CHEMICAL TITLES will be issued twice each month with each issue reporting approximately 3000 titles from the most recent chemical research. This service provides a current author and keyword index to selected chemical journals and is intended to fill the void between primary publication and the appearance of abstracts.

Taken from 575 journals—110 Russian—of pure and applied chemistry, these titles are listed for maximum convenience of use. The first part is a permuted title index in which keywords from each title are arranged alphabetically with each keyword in full or partial context. The second part is an alphabetical index of authors together with full titles of papers and journals in which they appear. You can find a source in a minute.

Timeliness matches ease of use. All titles are found in the listing *within two weeks of the time they are received* in the offices of The Chemical Abstracts Service, the publisher. No other index or alerting service provides such prompt and complete coverage.
