POSITIONS OPEN

CIRCULATION LIBRARIAN. A person versed in modern charging systems and familiar with circulation procedures, preferably in college libraries. Capable of supervisory duties. Good working conditions and benefits. Salary $6,000 or better, depending upon qualifications. Please write to Hardin Craig, Librarian, Rice University, Houston, Texas.

EVENING SERVICE LIBRARIAN. Young man preferred, with a college degree and an interest in library science. Position is open to be filled immediately. Growing library with new quarters in the near future. Salary is $4,800 and the possibility of an increment in six months. An excellent opportunity to grow professionally. Apply: Mrs. Sylvia Y. Kaplan, Librarian, Chicago Medical School, 710 So. Wolcott Street, Chicago 12, Ill.

CATALOGER for large college library, 45 minutes from Times Square, in residential area. Fifth-year library school degree required. Working knowledge of one or more foreign languages essential. At least 5 years experience desired, but will consider candidates without experience who have had advanced cataloging. Starting salary up to $6,700 depending on qualifications, annual mandatory increments to maximum of $7,850. Work week 35 hours, 30 during summer. Six-week paid vacation, excellent health and retirement plans. Faculty status and tenure after 3 years of successful service. Air conditioned building. Write Box 619, ACRL, 50 E. Huron St., Chicago 11.

CIRCULATION LIBRARIAN & ASST. REFERENCE LIBRARIAN. Both open immediately. Fifth year degree; experience desirable but not essential. Salary $5,000-$6,000 depending on qualifications. One month vacation. New library building; rapidly expanding campus; progressive ideas welcome. Donald J. Pearce, Head Librarian, University of North Dakota, Grand Forks, N. D.

LOS ALAMOS SCIENTIFIC LABORATORY has an opening for a Technical Librarian who would be responsible for work in the technical processes section of our library. The position requires a degree in library science plus a scientific or technical background. Experience in a technical library is necessary. The ability to read German, Russian or French would be desirable as would training or experience in the use of machine methods in library work. Delightful year-round climate. 24 days annual vacation. Please send resume to: Recruiting Office, Los Alamos Scientific Laboratory, University of California, Los Alamos, New Mexico.

Booksellers—Publishers—Importers  
Port Washington, Long Island, N. Y.
Founded in 1885, Moorhead State College has made the transition from State Normal School to State Teachers College to its present status as an accredited state-supported college of liberal arts. A focal point of the campus is the Livingston Lord Library, completed in 1960 in memory of the first president of the institution. The library, operated on an open shelf basis, utilizes Globe-Wernicke freestanding bookstacks for maximum flexibility. Weld Hall, at right, is one of the older classroom buildings—and uses the arch motif incorporated in the base of the Livingston Lord Library building. If you are considering a new library or modernizing an existing one, consult Globe-Wernicke's Library Planning Service. Write Department S-11.

SOVIET RESEARCH IN
THE EARTH SCIENCES
in English translation

GEOLOGIC ACTIVITY OF MICRO-ORGANISMS
EDITED BY S. I. KUZNETSOV, INSTITUTE OF MICROBIOLOGY, ACADEMY OF SCIENCES, USSR.
The possible practical use of microorganisms in prospecting for gas and oil is discussed in detail in this volume, which is one of the first to present a comprehensive survey of microbiological applications to controlled geological processes. The twenty technical papers by leading Soviet scientists cover a wide range of topics—the distribution and ecology of microorganisms, the effects of bacteria on the formation of sulfur, oil, gas, ground water, and oxidation products of sulfide ores. Emphasis is placed on the role of bacteria as geological agents in their various habitats, and Soviet research on ways of accelerating certain geological processes using the action of specific bacteria is of particular interest.

INDUSTRIAL AND EXPLORATORY GEOPHYSICAL PROSPECTING
This collection of 20 papers on the problems of industrial and exploratory geophysics presents many new techniques and applications. Among the topics dealt with are: the application of radiometry to evaluating reservoir properties in the Kaluga region; porosity and permeability of clastic rocks; distribution of neutrons in media with high water (hydrogen) content and in a model of a bed; use of neutron methods in studying drill holes; results and potentials of using regulated directional reception; and descriptions of apparatus used. Several reports are devoted to analyses of treating gravity data, to the development of a seismolocator, to an automatic arrangement for tying reference points together, and to related problems.

DEEP-HOLE DRILLING WITH EXPLOSIVES
BY A. P. OSTROVSKI, ALL-UNION SCIENTIFIC-RESEARCH INSTITUTE OF DRILLING TECHNIQUES.
This volume discusses the explosive or non-bit process of shattering rocks when drilling deep holes, and explores the new trend in worldwide application of explosives in technology. Methods of shattering rocks by impulses of high pressure of different intensities and durations (high-pressure jets of liquid, pressure in liquid during the closing of vacuum pockets, acoustical waves and cavitation, electrical discharge in liquid, underwater explosions) are described, as are thermal processes of shattering rocks (high-temperature jets of gas, plasma, high-frequency currents) suitable to conditions of drilling deep holes filled with liquid.

ORIGIN OF OIL AND OIL DEPOSITS
BY M. E. ALTVOISKI, Z. I. KUZNETSOVA, AND B. M. SHVETS.
This work is the result of five years of research undertaken by the All-Union Institute of Scientific Research in Hydrogeology and Engineering Geology (VSEGINGEO), into the migration, accumulation, and formation of organic matter and microflora contained in the underground waters in oil-bearing and non-oil-bearing regions and their effects on the processes of oil formation. Data is included on vertical zoning and the circulation of underground waters and materials found therein.

SOIL DRILLING BY VIBRATION
BY B. M. GUMENSKII AND N. S. KOMAROV, LENINGRAD INSTITUTE OF RAILWAY TRANSPORT ENGINEERS.
Soviet research on vibrodrilling—a new and promising method for geological investigations is discussed in this book. It contains a comprehensive analysis of thixotropic changes (liquefaction and subsequent solidification) in soils, explaining the physical basis of the vibrodrilling process, and also presents exhaustive data on the results of vibrodrilling.
The Definitive Index
of the entire aerospace field
THE PACIFIC AEROSPACE LIBRARY UNITERM INDEX
finds the exact technical material you want from more than 300 English language scientific periodicals covering:
aerodynamics • missile design • rocketry • astronautics • nuclear physics • metallurgy • communications • data acquisition and processing • mathematics • radar • computers • physics • automation • electronics • physical chemistry • aviation medicine • plastics • ceramics • ordnance • production • management
Material is located rapidly with pin-point accuracy. Sources include translations of Russian journals and other publications of worldwide scope.
The UNITERM INDEX is unique in its field; more than 50% of the periodicals indexed do not appear in any other cumulative index. It is not bulky, complete in its binder it weighs only 3½ pounds.

RELIGIOUS DRAMA ENDS and MEANS

by HAROLD EHRENSPERGER

Written out of a wide experience in religious drama, this volume provides a broad basic understanding of the art and form of dramatic expression and shows how it may be used for more meaningful worship in church.

As background to this, Mr. Ehrensperger explores the history of religious drama and its contemporary significance. Sufficiently basic for use in the drama classroom, this book is at the same time a clear and excellent guide for actual productions performed in the church without professional direction.

288 pages. Illustrated, $6

ABINGDON PRESS

Publisher of THE INTERPRETER’S DICTIONARY OF THE BIBLE and THE INTERPRETER’S BIBLE
INFORMATION U.S.S.R.

THE MOST COMPLETE SOURCE OF INFORMATION ON THE U.S.S.R. EVER PUBLISHED IN ENGLISH

Edited by Robert Maxwell, Oxford

This authoritative volume covers every major aspect of life in the U.S.S.R. It provides all essential information on the history, geography, people, political and governmental institutions, science, industry, culture, and sports. The book features a translation, by J. T. McDermott, of the entire survey volume (Volume 50) of the Great Soviet Encyclopedia. It includes addresses and pertinent details concerning the authorized trading organizations in the Soviet Union— who have a monopoly on imports and exports.

Chronological tables list important dates in the economic, social, cultural, and political history of the U.S.S.R. A statistical section contains the official census figures up to and including 1960 relating to population, production, and consumption, together with detailed facts about industrial and agricultural output, transport and communications, employment and training, education, living standards, etc.

The volume also includes addresses of institutions of higher learning, names of faculties, and a selected bibliography of recent books on the U.S.S.R. The final appendix is a résumé of the Third Program adopted at the 22nd Congress of the Communist Party of the Soviet Union.

INSTITUTE FOR THE STUDY OF THE USSR
New York Office
30 East 42nd Street

Two hundred universities, research groups, government agencies—here, in Mex-
ico, in Canada and overseas: Finland, Formosa, India, Japan, Denmark, England,
Holland, Germany, South Africa, Israel, et al.—have ordered "Your Nose Knows."

... and nobody yet has proved it wrong.

Sometime ago, in this magazine, we said:

"... you will not quickly believe this book, but neither will you quickly
forget it. And whenever you encounter the fumbling, faltering attempts-at-explanation of Personality, and Likes-and-Dislikes, and Dreams, and
other enigmas present-day Psychology cannot explain, you are going to
remember that there is a theory that explains them, simply, straightforwardly..."

We say it again.
