Virginia Almanacs

*A Checklist of Virginia Almanacs, 1732-1850.*

Because the almanac played a significant role in the reading habits and in the history of printing of the United States, studies such as that of the Bears are welcome. However, coming as it does, just prior to the publication of Milton Drake's comprehensive bibliography of American almanacs, 1639-1875, some may wonder if it is essential.

Checking the Bears's work against the collection of Virginia almanacs at the American Antiquarian Society, this reviewer found only one almanac not listed, the 1808 issue of *The Good Old Virginia Almanack* (Richmond, Thomas Nicolson). We also have several issues of *The Farmer's Calendar,* by Charles Egelmann, which, although printed in Baltimore, nevertheless bear a Virginia imprint. The Bears, no doubt, excluded this on the basis of its origin, a decision certainly defensible.

Proofreading slips in numbers 165 and 290 resulted in the exclusion of the location symbols, although Massachusetts Worcester Antiquarian Society has both. In addition, MWA is not credited with owning the following items: 35, 36, 37, 38, 103, 147, 209, 240, 253, 256, 284, 294, 329, 339, 348. This library also possesses variants of 245, 336, 340, and 354. Except for 245, they are minor. The first, however, is worthy of mention as the variation is to be found in the imprint, "John Warrock for Frederick A. Mayo."

Generally, the compilers have produced a useful work of limited scope. The biographical notices of the philomaths are a happy addition.

In truth, half a loaf is better than none, but it is sad that the publications of so distinguished a society appear in such shabby raiment.—M. A. McCorison, *American Antiquarian Society.*

Books Briefly Noted

*The Contemporary Arts,* by Bartlett H. Haynes, Jr. [Chicago]: ALA in Cooperation with the Public Affairs Committee, Inc., [1962]. 20p. (Reading for an Age of Change, No. 2) $.60.

The Impact of the Library Services Act: Progress and Potential, papers presented at an institute conducted jointly by the University of Illinois Graduate School of Library Science and the Library Services Branch, U. S. Office of Education, November 5-8, 1961; edited with a foreword by Donald E. Strout. Champaign, Ill.: The Illini Union Bookstore, [1962]. 120p. $2.00.

Magisteri Terrarum, a Selection of Old and Rare Books, 1497-1798, from the Library of the University of California, Davis, California, edited by Hilton Landry. Davis, Calif.: The Library, University of California, 1962. 55p. Apply.

Space Science, by Ralph E. Lapp. [Chicago]: ALA in cooperation with the Public Affairs Committee, Inc., [1962]. 52p. (Reading for an Age of Change, No. 1). $.60.

that 73.05 per cent of the titles (7,665,800) and 57.34 per cent of the pages (1,720,570,000) were printed since 1869. Foreign imprints accounted for 65.72 per cent of the titles and 56.2 per cent of the total pages. A breakdown by decade of publication was made, as well as one by country of publication, but the number of items in each category is too small to provide estimates deserving of much confidence.

From the standpoint of preservation, the magnitude of one phase of the problem has been indicated more clearly than before by the estimate that books (not serials) printed since 1870 and represented in the National Union Catalog contain approximately one and three-quarter billion pages.—Edwin E. Williams.
