## How to get a microfiche reader free

**Need a microfiche reader?** You probably do with all the material coming out on microfiche from the Atomic Energy Commission, the Space Administration, the Clearinghouse for Federal Scientific and Technical Information and other sources. Why not take this opportunity to get the newest—THE FR-5—free.

**Our offer.** Quite simple, really. You purchase \$450.00 worth of microfiche making your selection from an extensive list of titles—with your purchase you will receive the latest in microfiche readers—the FR-5—free of charge. The list includes such basic works as *Beilsteins Handbuch*, *Chaucer Society Publications*, *Monatsbeste für Chemie*, *The Nation*, *Faraday Society Transactions*, *Library Journal*, *Gazetta Chimica Italiana*, and many, many others including such current journals as *Atlantic Monthly*, *Harpers*, *National Review*, *Science News Letter*, *Wilson Library Bulletin*.

**Delivery.** You will receive your reader before Sept. 1, 1965.

**Our microfiche.** These are positive microfiche (black image on a white background) which are identical in size to standard library catalog cards (75mm x 125mm or approximately 3" x 5"). They are manufactured for us by our affiliate, the Microcard Corporation of West Salem, Wisconsin, the world's largest producer of microfiche. They are, as are all our publications, fully guaranteed—if for any reason you are not satisfied you may return any title within 30 days of the invoice date for a full refund. Current journals are filmed to the standard adopted by the National Microfilm Association, the Atomic Energy Commission, and the National Aeronautics and Space Administra-

tion. The low reduction ratio used assures excellent legibility. A sample fiche will be supplied on request.

**The FR-5 Microfiche Reader.** The brand new FR-5 Microfiche Reader was made to meet the needs of today's libraries. It is designed for use with *all* microfiche in current production (e.g. AEC, NASA, Thomas Micro Catalogs, chemical patents) and with all projected microfiche that adhere to the standards adopted by the National Microfilm Association (see, *National Micro News*, No. 66 (October, 1963), 42-76). The screen image is incredibly sharp and clear. Among the FR-5's many features:

Dual magnification (16½× and 22×) ★ Accepts fiche up to 6" x 6" ★ Easy bulb changing ★ No maintenance ★ Precision fiche holding mechanism for easy horizontal and vertical scanning. **Specifications:** Magnification—16½× and 22×; Screen size 7½" w x 9⅛" h; Height—12"; Width—7½"; Depth—10½"; Amount of table space occupied—7½" w x 10½" d; Weight—12 lbs; Bulb—25 watt; Price—\$125.00 f.o.b. West Salem, Wisconsin.

The FR-5 will be displayed at the following conventions: National Microfilm Association (Cleveland); American Library Association (Detroit).

**Deadline.** This offer expires on July 31, 1965. Why delay? Write today for details.
