*Research & Microfilm Publications (RMP) provides a complete indexing service to the entire output of translations by the US Joint Publications Research Service. Each year approximately 250,000 pages of translated foreign social science and scientific documents, journals, books, and reports are microfilmed and indexed in detail.

RMP issues, on a subscription basis, four monthly bibliographic indexes—China-Asia • Soviet Union • East Europe • International Developments (Africa, Latin America, Near East, International Communist Developments). A subject index and a complete catalog listing of all JPRS documents is published semi-annually.

Microfilm is available for any or all geographic areas. Microfiche is also available. Backfiles can be obtained for all years back to 1962 and in some cases as far back as 1957. Also over 600 scholarly book titles in translation are available by Xerox reproduction.

"I found LC 67-119079 in less than two minutes... all by myself." That’s how easy LC searching is with IDC’s Micrographic Catalog Retrieval System. It’s the new System that lets libraries use their professional staff to the best possible advantage. And, makes LC search and print out so routine even clerical personnel have no difficulties.

IMAGINE THAT...

IDC’s Micrographic Catalog Retrieval System puts an end to the days when it took a real “pro” to unscramble the Library of Congress Catalog. This new, high speed system automates LC search and print out procedures. To begin with, we’ve compiled a quick-find Index by both LC Card Number and Main Entry. Then, the actual LC entries are reproduced on Microfiche cards, over 1,100 entries on each card. (A 20-inch desk-top Microfiche file contains millions of entries.) Your people simply locate the entry in the Index, select the proper Microfiche card, and insert this card in a Reader Printer. Six seconds later... a full-size LC copy.

IDC’s Micrographic Catalog Retrieval System is always up-to-date... weeks ahead of ordering printed LC cards and includes back issues through 1963. Subscribers receive weekly issues on Microfiche of approximately 3,000 advance release LC cards, all alphabetized and interfiled Main Entry. Cumulative supplements, issued monthly, quarterly, and annually, are also provided, completely indexed by LC Card Number and Main Entry.

The M-C-R System is the best way to increase the effectiveness of your professional’s time, speed work flow, and keep up with current LC output. If you would like us to show you exactly what we mean, simply return this time-saving coupon.

This bibliography is the result of several years of work by the Libraries Study Project of the Association of American Law Schools.

The set is a compilation of 45 subject lists which will provide libraries with carefully selected and briefly annotated lists of law books which are recommended for inclusion in libraries of various sizes. Complete in six binders, the work will contain well over 3000 pages, will recommend in excess of 40,000 titles and will contain 47 pamphlets (45 subject lists with an Introduction and a General Index). More than half of the subject lists are presently available and all of the lists should be available by the end of 1968.

"Although planned as a book-selection guide for law libraries, the annotated subject arrangement of this work makes it a valuable tool for librarians and scholars in other fields as well. Each of the forty-six topics, ranging from accounting to trade regulations, is published as a separate pamphlet, and may be purchased as such. Upon completion of the final list by December 1968, this cooperative evaluation of the best in the legal literature will be one of the most useful tools available for research and for acquisition of law materials. Periodic supplements will be offered."

C.B.V. 29 College & Research Libraries 350 (July 1968)

"As a reference work with a potential for easy updating, this set bids fair to be a standard set for law treatise bibliographical work. It is accurate, its judgment and authority impeccable, and its format flexible. Law libraries will have to buy it; university and public libraries that have substantial reference facilities should buy it in this present era of interdisciplinary activity; other libraries will have to wrestle with those imponderables such as buying the real thing or a reference to it."

Edward J. Bander, 93 Library Journal 1599. (1968)

If we don’t have the out-of-print book you’re looking for, we’ll find it, film it, clear copyright, pay royalties and send it to you for 4¢ a page.

Even if we end up in the Alps. Like we did last year to microfilm 11th and 12th century manuscripts in monastic scriptoria.

Usually, we just have to go downstairs to our vaults where we keep over 50,000 titles. But whether we go to Timbuktu or whether the original is worth $10 or $10,000, the cost for your copy is the same. A penny-and-a-third a page for 35mm positive microfilm. Four cents a page for a paperbound xerographic copy. Six cents a page for a copy in a foreign language.

This service often costs less than an interlibrary loan. And you get to keep the book.

Write for University Microfilms’ out-of-print book catalogs. Tell us what fields you’re interested in.

Why should you look for things when we’ve already found them.

XEROX
WORLD MEETINGS
must form a part
of the ready reference collection
of every good
scientific and technical library

The World Meetings publications—World Meetings
... United States and Canada and World Meetings
... Outside U.S.A. and Canada—are the definitive
references to meetings and their literature. They
supply information in depth on future meetings of
interest to the scientific, medical, and engineering
communities throughout the world. These journals
are completely revised and cumulated each quarter
and represent the most complete and accurate
archive of information on meetings available.

Detailed listings give information on the technical
content, publications, exhibits, deadlines for pa-
er, name, date, and location of each meeting in
addition to the names and addresses of the persons
to contact for further information in these areas.

Five pre-coordinated, computer-produced indexes
give quick access to the data in the listings. A
system of invariant registry numbers greatly sim-
plifies the problem of following any meeting from
issue to issue and provides the librarian with a
method of using World Meetings as an aid to the
cataloging and retrieval of meetings literature.

Information included in the World Meetings publi-
cations is obtained entirely by direct inquiry to the
organizers of the meetings rather than from sec-
dondary sources. All listings are verified and up-
dated at three-month intervals.

The World Meetings publications are compiled,
edited, and indexed by a full-time professional
staff and are reviewed regularly by our editorial
advisory boards of distinguished engineers, scien-
tists, physicians, and information experts. These
reviews ensure the user that the publications keep
abreast of the rapidly changing worlds of science,
engineering, and medicine.

With the scientific and technical community spend-
ing more than $1 billion each year on meetings,
can you afford to have this reference more than an
arm’s length away? Send the coupon now.

GUIDE TO REPRINTS. 1968.
An annual, cumulative list, in alphabetic order, of books, journals, and other materials available in reprint (full-size, hard-bound) form from publishers in the United States and abroad. Over 17,000 titles issued by 101 reprint publishers. 128 pp. Softbound. Postage paid, $4.00.

GUIDE TO MICROFORMS IN PRINT. 1968
An annual, cumulative list, in alphabetic order, of books, journals, and other materials available on microfilm, microfiche, and other microforms from publishers in the United States. Over 15,000 titles. 118 pp. Softbound. Postage paid, $4.00.

SUBJECT GUIDE TO MICROFORMS IN PRINT. 1967-68.
A biennial, cumulative list, by subject classifications, to books, journals, and other materials available on microfilm, microfiche, and other microforms from publishers in the United States. 110 pp. Softbound. Postage paid, $4.00.

READER IN LIBRARY ADMINISTRATION.
Edited by Paul Wasserman and Mary Lee Bundy. The first in our Reader Series in Library and Information Science, this book contains essays not only by specialists in library administration but also by management experts from other fields such as Edward Litchfield, Peter Drucker, Amitai Etzioni, and Herbert Simon. 403 pp. Hardbound. $10.95.
At a staff meeting, two assistant librarians, having already pulled out all of their hair when it was announced that their library was going to be reclassified from Dewey to Library of Congress, began to wonder whether the Chief Librarian wore a toupee—since he appeared so unruffled. He answered both questions by announcing that Bro-Dart is equipped to easily and painlessly reclassify collections.

P.O. Box 923, Williamsport, Pa. 17704 Dept. CRL-115

Attending an excellent performance of *Hamlet*, in the midst of the protagonist’s famous soliloquy, one librarian murmured to another, “Rather than take arms against a sea of troubles, the headaches and the thousand natural shocks that librarians are heir to, let us avail ourselves of Bro-Dart’s Alanar custom cataloging and processing.”

Dept. CRL-115 P.O. Box 923, Williamsport, Pa. 17704
Gaylord
Microfilm Cabinet

... a complete centralized filing system for both 16mm and 35mm rolls ... featuring high quality at low cost ... a best buy in every way

With this in your library you can keep all of your microfilms together ... safe, handy, instantly available ... in a handsome, modern, compact all metal storage cabinet, only 20½" wide, 28½" deep, 52" high.

• LARGE CAPACITY
  Nine four-compartment drawers hold up to 900 rolls of 16mm or 612 rolls of 35mm, or any combination of the two sizes.

• RAPID RETRIEVAL
  Locate any film in seconds.

• DELUXE CONSTRUCTION
  Sturdy metal throughout. Smooth rolling drawers have thumb latch control, open wide without spilling.

• 16 STANDARD COLORS
  or custom finished to your specifications. Standard colors: Beige, Black, Brown, Cordovan, Parchment, Royal Russet, Sandstone, Gray (5 shades) Green (4 shades). On special order (small extra charge) we will lacquer these cabinets to match your color sample.

• AUTOMATIC DRAWER LOCK
  Optional at small extra charge.

Please write for prices and further information.

For new convenience in using CHOICE . . .

With the first issue of Volume 5, March 1968, CHOICE began an additional service long requested by subscribers — CHOICE Reviews-on-Cards. If you were not among the service's charter subscribers, you may want to consider it now.

CHOICE Reviews-on-Cards can bring to your acquisitions system a new convenience as versatile as you want to make it. Cards make it easy to separate and distribute reviews simultaneously to other librarians and faculty — no more tearing up copies or waiting forever for circulating copies to return. Cards can save clerical steps in ordering and checking holdings (ample space for notations on both front and back of each card). They are a cataloging aid, and they are easy to locate in your desiderata file. You can probably think of dozens of other uses in your own system.

DESCRIPTION OF CARD REVIEWS
As each regular issue of CHOICE goes to press, all reviews in the issue are reprinted separately on 3 x 5 cards. Each is identified by subject heading and issue date. Collated in the order followed in the magazine, they are boxed and mailed to you via Fourth Class mail, Special Handling.

DELIVERY OF CARDS
Fourth Class, Special Handling means your box of cards is carried from our post office to yours with regular First Class mail, but delivered according to your local Parcel Post delivery schedule. You should receive cards at about the same time as your regular issue by Second Class mail.

SUBSCRIPTION TO REVIEWS-ON-CARDS
Cards are available by yearly subscription at a cost of $80. With current publication of more than 5,500 reviews per year, the cost of the card service is less than 1 1/2 cents per review. Cards are available only to regular CHOICE subscribers.

HOW TO ORDER
Subscriptions to Reviews-on-Cards should be ordered from Subscription Department, American Library Association, 50 E. Huron Street, Chicago, Illinois 60611. They are not available through agencies. An order form is provided below for your convenience. New subscriptions are started with the next available issue following receipt of orders.

For additional information regarding Reviews-on-Cards, please write CHOICE Editorial Offices, 100 Riverview Center, Middletown, Conn. 06457.
When we first announced the publication of Science Citation Index®, skeptics said that it couldn't be done—that we could not maintain the initial low cost of $1250 per year for SCI®. Contrary to this pessimistic prognosis, ISI has, in effect, reduced the price of SCI by 20%. When you purchase a five-year run of SCI for 1964-1968, including the quarterlies for 1968, you pay only an average $1000 for each year. The arithmetic is simple: you pay the same price for the 1968 SCI as when it started in 1964—$1250—but you get the 1964 and 1965 editions at half-price, saving $1250 in all. In other words, you get those five years of SCI for the price of four—a total discount of 20%.

And consider this: Although the price in 1968 is the same—$1250—as in 1964, the number of journals covered by SCI has tripled—an increase from 700 in 1964 to over 2000 in 1968!

Each calendar-year edition of SCI is a completely different and permanently valuable reference tool. Each quarterly alone is a storehouse of information (and the quarterly issues can also be used in satellite libraries). Each annual is truly a record of the year’s research—the only calendar-year index published.

Don't be misled by false claims—SCI is the only index for science published based on the concept of citation indexing. ISI invented the SCI. SCI is the only index in which you can trace the path of related scientific ideas through the years and across the arbitrary boundaries imposed by conventional classification systems and title indexing.†

The fact that the 1968 SCI will contain over two million citation access points might seem meaningless in itself, were it not indicative of the orderly way in which this large reservoir of interdisciplinary data has been made available to you. Each access point represents an avenue of approach into the current scientific literature—a starting point in a search—that enables you to extract precisely that information which is most relevant to each of your scientist's particular needs—time and time again.

A recent article by C. C. Spencer illustrates the unique role of SCI in the library. "Subject Searching with Science Citation Index: Preparation of a Drug Bibliography Using Chemical Abstracts, Index Medicus, and Science Citation Index 1961 and 1964" can be found in American Documentation, Vol. 18, No. 2, pages 87-96 (1967).

A final word of caution to forward-looking librarians: We all resent the high charges made for reprinted editions of important bibliographical works. So don't wait until SCI is out of print. We do not have an inexhaustible supply. Indeed, SCI sales have exceeded our expectations and supplies will be exhausted within the next few years.

Now is the time for you to act. If you are planning a new library, reserve your SCI set now.

† We ought to know. We also publish the largest title index in the world. (It's called Permuterm® and it's sold to our SCI customers at a special discount.)

14 Good Reasons Why
You Should Spend $1250 a Year
for a
Permuterm® Subject Index

1 MULTI-ENTRY INDEXING The key to PSI™ Indexing is title indexing in-depth by presenting alphabetized entries for every possible pairing of words in titles and subtitles.

2 SPEED AND FLEXIBILITY PSI's technique of pairing words enables the user to locate any combination of terms quickly without having to examine a number of irrelevant items under a particular term.

3 SPECIFICITY AND SELECTIVITY PSI searches involving a single term are quick and efficient. Searches involving two or more terms are especially easy, as simple as an alphabetical look-up. Terms may even be used to exclude certain types of information.

4 UNIQUENESS The PSI is a "natural language" indexing system based on the real language of science, the current living vocabulary used today by publishing authors, not indexers.

5 COMPREHENSIVENESS The PSI policy of indexing all articles within a journal, regardless of discipline, prevents coverage gaps associated with the selective subject indexes.

6 JOURNAL SELECTION The PSI selection of important journals in all important fields is based, in part, on highly accurate citation analyses of their articles, not a mindless lifting of titles from other lists.

7 MULTIDISCIPLINARY SCOPE The PSI covers over 90 disciplines, categorizing the journals by subject and by country.

8 EXTENSIVE COVERAGE The PSI for 1967 covers 300,000 scientific and technological items.

9 SOURCE IDENTIFICATION All the source items are listed alphabetically by author in the accompanying Source Index. The source material identifies type of items as well as all co-authors and includes full bibliographic details.

10 CROSS-REFERENCED AUTHORS Comprehensive cross-references are provided for every co-author. Thus, all current articles by a given author can be identified in one place in the Source Index.

11 CALENDAR YEAR COVERAGE The PSI is a calendar year index and, for the journals covered, includes all items published and available by the end of the year.

12 TRANSLATION Foreign language titles are indexed under the corresponding English terms. Judicious man-machine editing has been applied as much as possible to standardize spelling variations.

13 RELIABILITY The PSI is produced by ISI, leader in producing proven information retrieval and dissemination services.

14 SAVINGS If you're already a subscriber to the Science Citation Index®, you can save an extra $550. The price of the PSI to SCI® subscribers is a low $700.

And there is more. Find out for yourself. Write today to Dept. 101-91. We'll send details, information and sample formats.

Institute for Scientific Information
325 Chestnut Street, Philadelphia, Pennsylvania 19106, USA
HAFNER PUBLISHING COMPANY announces a new Series
"Pioneering Concepts in Modern Science"
Edited by ROBERT M. FRIEDENBERG, Ph.D.
Psychiatric Institute, University of Maryland

The purpose of this Series is to advance the opportunities for scientists
working in highly specialized fields to publish their ideas and thoughts on
the most advanced fronts of their disciplines. The audience is the pro-
fessional person but non-specialist. The contents of these books will reflect
the individual author's most advanced points of view in his field. Many of
these representations may still be early in their embryonic development;
thus, controversial and somewhat speculative in their outlook. The history
of science indicates that pioneering concepts are created by those workers
identifying themselves and their disciplines with controversial, speculative
and unorthodox problems. Emphasis is given to fundamental and theoretical
studies as they form the backbone and structure for experiment and inter-
pretation. Thus, the basic categories of chemistry, physics and biology
will receive much attention. Biology as the stepdaughter of the sciences,
where progress has been limited in comparison with other classical fields,
will receive a greater contribution of effort. The importance of readability
by the non-specialist cannot be overemphasized. It is hoped that this pur-
pose will be served by summarizing the frontiers of thought in each field
while offering the reader the opportunity for further study.

NOW READY

Volume 1
Unexplored Model Systems
in Modern Biology
ROBERT M. FRIEDENBERG
Associate Professor, Division of Neurobiology
University of Maryland School of Medicine
Baltimore, Maryland

x 98 pages. 1968 $7.50

The overall purpose of this book is to
offer one approach in understanding the
methods of modelling in biophysics. The
subject matter is drawn from a survey of
biological model systems with emphasis
upon those areas least understood. Ef-
forts are made to consider the funda-
mental principles upon which a "life sys-
tem" are based.

Following Volumes in preparation

Volume 2
Computer Assistant Learning
ANTON F. VIERLING and
JACQUELINE S. VIERLING
Physics Department
United States Naval Academy
Annapolis, Maryland

Volume 3
Cerebral Training: An
Application of Clinical
Neurophysiology
ERNST SCHMIDHOFER
Director of Professional Education and Training
Perkins State Hospital
Jessup, Maryland

Volume 4
Trace Lipids
PADMANABHAN P. NAIR
Director, Biochemistry Research Division
Sinai Hospital of Baltimore, Inc.
Baltimore, Maryland

Volume 5
Biocoulokinetics
MILTON J. ALLEN
Professor of Biophysics, Physiology Department
Georgetown University Medical School
Washington, D.C.

Volume 6
Unexplored Model Systems in
Modern Biology: Computers
and the Nervous System
ROBERT M. FRIEDENBERG and
ROBERT G. GRENNELL
Division of Neurobiology
University of Maryland Medical School
Baltimore, Maryland

Stechert-Hafner, Inc.
