ENCYCLOPEDIA OF ASSOCIATIONS

*THOUSANDS OF REVISIONS!
HUNDREDS OF BRAND-NEW
ENTRIES!*

For fourteen years the *Encyclopedia of Associations* has been the busy librarian's key to primary sources of up-to-date information on every conceivable subject. The new Sixth Edition of this indispensable reference work has been enlarged and completely revised, with changes, corrections, and/or additions in over 90% of the entries, plus over 1100 brand-new entries.

Through their publications, projects, research reports, personal replies to questions, and other services, associations are a unique source of essential, timely information. The Sixth Edition of the *Encyclopedia* tells you precisely whom to contact for reliable facts on such pertinent subjects as ecology . . . data processing . . . women's rights . . . atomic research . . . birth control . . . civil rights . . . industrial waste . . . underdeveloped nations . . . lasers . . . urban problems . . . geriatrics . . . cultural exchanges . . . space exploration.

VOLUME I: NATIONAL ORGANIZATIONS OF THE UNITED STATES

This basic source-of-sources covers nearly 14,000 national, nonprofit membership organizations. Included in the broad coverage are selected non-membership groups; foreign groups of interest in America; U.S. local and regional groups of national interest; and citizen action groups and governmental advisory bodies concerned with specific problems.

Typical entries cover seventeen vital items, including the organization's name, address, and telephone number (if supplied by organization); its purpose and objectives; name and title of chief executive; number of members; publications; and convention schedules.

Organizations are grouped into nineteen categories according to their principal interests (Business, Hobbies, Social Welfare, etc.). The listing for any organization can be found instantly through the 30,000-item keyword/alphabetical index, in which organizations are listed both by complete proper name and under the keyword or keywords which best identify their fields of activity.

VOLUME II: GEOGRAPHIC AND EXECUTIVE INDEX

This two-part index provides two additional approaches to organizations and their executives: The GEOGRAPHIC section lists in state and city order the associations which are arranged in Volume I according to subject interest. The geographic index includes executive names. The EXECUTIVE section lists by surname executives mentioned in Volume I, and gives their titles and the names of their organizations. Both indexes include phone numbers (if supplied by organization); the geographic index includes addresses with zips.

VOLUME III: NEW ASSOCIATIONS AND PROJECTS

New associations are of particular interest to researchers because such new groups tend to be concerned with new ideas and new problems on which they are often the only sources of current information. NAP, a quarterly supplement to Volume I, reports promptly on hundreds of such organizations during the period between editions of the basic volume. NAP listings contain all the same details included in entries in Volume I, plus a cumulative index in each issue.

POPULATION INDEX BIBLIOGRAPHY

Cumulated 1935-1968

by Authors and Geographical Areas

Princeton University

This publication reproduces the cumulative card catalog of the bibliographic citations in the first 34 volumes (1935-1968) of *Population Index*.

Since 1935, when the quarterly appeared under the title *Population Literature*, a principal feature of each issue has been an annotated, topically arranged bibliography of current books, monographs, articles, and documents published in Western, including Slavic, languages. Since 1936 the bibliography has been prepared by the Office of Population Research, Princeton University, which publishes *Population Index* for the Population Association of America. In addition to the resources of the Office of Population Research, the major resources utilized are current acquisitions of the Princeton University Library, The New York Public Library, the Library of Congress, the United Nations Headquarters Library, and the Library of the New York Academy of Medicine.

The card catalog, now published for the first time, comprises the working files that have been maintained for reference by the editorial staff of *Population Index*. The catalog contains two sets of the numbered entries appearing in Volumes 1-34, together with their annotations or indicative abstracts.

The division of the catalog is twofold. In the first, titles are arranged alphabetically by principal author, whether individual or institution. Publications of national statistical offices are subclassified as censuses, vital statistics, yearbooks, and other official statistics. In the second, the geographical part of the catalog, titles are grouped by continent and country, and within countries by major topics, including subtopics for the United States. Because the topical scheme was redesigned in 1954, the geographical file is in two sections, the first covering bibliographic citations from Volumes 1-20 (1935-1954) and the second, those from Volumes 21-34 (1955-1968). English translations of titles are provided.

Estimated 180,000 entries reproduced in 8 volumes
Prepublication price: \$595.00; after April 30, 1971: \$745.00

10% additional charge on orders outside the U.S.

Descriptive material on this title and a complete catalog of publications are available on request.

Dictionary Catalog
of the Princeton University
PLASMA PHYSICS
LABORATORY Library
Firestone Library, Princeton University

The Plasma Physics Library had its beginning with the inception of the controlled thermonuclear fusion research program at Princeton University in 1950. Classified as Project Matterhorn until 1958, the Laboratory rapidly expanded after declassification to encompass a broad program in basic plasma physics and in allied astrophysical research as well as the accelerated work on fusion.

International interest in this field coupled with a high degree of cooperation among the various research facilities has generated an abundant literature. This growth has been reflected in the Plasma Physics Library which has necessarily maintained a high level of current awareness. Due to the relative youth of the plasma physics discipline, the bulk of the literature currently resides in technical journals and reports with a smaller fraction appearing in book form. A strong journal collector, combined with excellent access to sources of unpublished references and to English translations of foreign articles, helps to insure thorough coverage of the literature. The library also includes microfiche of all reports on controlled thermonuclear fusion issued by the United States Atomic Energy Commission and a copy of each dissertation presented by the Plasma Physics Laboratory doctoral candidates.

Complete cataloging of each document includes an abstract as well as descriptive cataloging. Minimal cataloging is done for microfiche. The catalog is arranged in alphabetical form so that each report can be located under authors, originating organization, report number and subject headings. The catalog originally had an alphabetical arrangement of titles under each author entry but this is gradually being changed to a chronological arrangement to facilitate easier access to the literature.

A unique feature of the catalog has been the systematic indexing of pertinent journal articles begun when the library was established. This service continues. The library consists of approximately 15,000 journal articles, reports, reprints, and books, fully catalogued. Cards for every type of material have been interfiled in one alphabetical sequence, and the catalogue now numbers an estimated 62,000 cards.

Estimated 62,298 cards reproduced in 4 volumes
Prepublication price: \$240.00; after April 30, 1971: \$300.00

10% additional charge on orders outside the U.S.
