

An American National Bibliography

*Instant access
to 28 years of
American
book
publishing*

THE AMERICAN BOOK PUBLISHING RECORD CUMULATIVE: 1950-1977 is one of the most important bibliographic projects in the R.R. Bowker Company's 100-year history. It is the first and only national subject bibliography to cover in one cumulation 28 of the most productive and fertile years of American publishing.

Produced with care and precision from the American Book Publishing Record database, from the *National Union Catalog*, and from the Library of Congress MARC tapes—it is the most immediately valuable cataloging and bibliographic tool ever offered to acquisitions librarians, reference librarians, subject specialists, and everyone in the world of librarianship and scholarship.

The main entry sequence of this 14-volume set (printed on acid-free paper with Smythe-sew bindings) is a single interfiled cumulation of some 850,000 catalogued entries, arranged by all the Dewey Decimal Classification categories, with separate sections for adult and juvenile

fiction. Separate author and title indexes cross reference to the main entry sequence. The separate subject index is arranged by Library of Congress subject tracing, includes LC call numbers, and refers to the Dewey classification of the entry indexed.

This unique arrangement enables you to find virtually every book published and distributed in the United States during this 28-year span—by author, by title, by Dewey Classification, and by LC subject headings—without knowing the year of publication.

THE AMERICAN BOOK PUBLISHING RECORD CUMULATIVE 1950-1977: An American National Bibliography is a milestone in bibliographic reference publishing. Please reserve your sets now. Because of the scope of the project and the extremely competitive price at which it is being offered, a second printing of these volumes will not be possible.
