NEW Up-To-Date Books
From Noyes Data

NOYES DATA has developed two new techniques of vital importance to those who wish to keep abreast of rapid changes in technology and business conditions: 1) our advanced publishing systems permit us to produce durably-bound books within a few months of manuscript acceptance; 2) our modern processing plant ships all orders on the day after they are received.

HARDCOVER BOOKS—LATE 1978

DRINKING WATER DETOXIFICATION edited by M.T. Gillies: Reviews the methods used to remove toxic chemicals from drinking water including toxic substances formed by chlorination. It also concerns itself with proposed amendments to the Safe Drinking Water Act of 1974. ISBN 0-8155-0723-2; $48

TRACE CONTAMINANTS FROM COAL edited by S. Torrey. There is a paucity of information about the far-reaching impact of trace elements which become ecological contaminants upon their release by the burning of coal. This book assesses their potential hazards in a critical and exhaustive manner. ISBN 0-8155-0724-0; $39

ACTIVATED CARBON—MANUFACTURE AND REGENERATION by A. Yehaskel: Activated (adsorptive) carbon is made from diverse raw materials yielding a porous structure when carbonized. Activated carbon enjoys many established markets and in industrial and municipal water purification its consumption is on the increase. ISBN 0-8155-0725-9; $42

INORGANIC CHEMICAL INDUSTRY—PROCESSES, TOXIC EFFLUENTS AND POLLUTION CONTROL by M. Sittig: Even the life sciences are very much dependent on these "heavy" chemicals. New commercial processes are shown, as well as detailed technology avoiding pollution as much as possible. ISBN 0-8155-0726-7; $42

GEOTHERMAL ENERGY—RECENT DEVELOPMENTS edited by M.J. Collie: The heat underneath the Earth's crust is a desirable alternate source of energy. In this book studies of electrical and nonelectrical uses of geothermal energy with cost analyses are given. ISBN 0-8155-0727-5; $36

VITAMINS—SYNTHESIS, PRODUCTION AND USE—ADVANCES SINCE 1970 by C.S. Sodano: With the introduction of many slimming diets, a new era of vitamin consciousness and demand for vitamin supplements seems to have arisen. This book is designed for the manufacturing chemist. ISBN 0-8155-0728-3; $42

BOILER FUEL ADDITIVES FOR POLLUTION REDUCTION AND ENERGY SAVING edited by R.C. Elliot: A study of the effectiveness of chemical additives not only in reducing smoke and particulate emissions, but also as a means of increasing overall boiler efficiency and thus conserving fuel. ISBN 0-8155-0729-1; $36

EUROPEAN TECHNOLOGY FOR OBTAINING ENERGY FROM SOLID WASTE edited by D.J. De Renzo: Serious study of this book should make it possible to reveal and identify solid waste/energy processes (both existing and under development) that offer advantages over U.S. processes. ISBN 0-8155-0730-5; $39

THE ALL-IN-ONE FOR ALL!
A single volume, time-saving reference for research and reading

The NEW HUTCHINSON 20th CENTURY ENCYCLOPEDIA
edited by E. M. HORSLEY

Packed with thousands of concise and accurate references and hundreds of illustrations to stimulate the curiosity of adults and students alike.

More than 15,000 entries • Current and concise
Easy-to-use format (7¾x9¾)
Alphabetical organization • 32 page color atlas
Over 1,600 photos, maps, drawings
Pronunciation guide • Extensive cross references
Metric measure & handy conversion table
Dictionary of abbreviations • 1336 information packed pages

only $29.95

The next time someone asks who, what or where, be sure to hand them THE NEW HUTCHINSON 20TH CENTURY ENCYCLOPEDIA. For fast reliable information, it’s the best reference in your library. And at $29.95, the best encyclopedia buy.

Why build a great collection with anything less than microform?

Even one small room can house a great serials collection on microform. And because this space advantage is so obvious, some people tend to overlook the other advantages of developing their holdings on microform. Consider these reasons microfilm will help you make your collection great:

**Availability.**

In depth and range, University Microfilms International’s serials titles on microform are impressive. Over 11,000 serials covering hundreds of special subject areas and numerous difficult-to-obtain titles are available to you right now. And our collection is constantly being expanded to meet your needs.

**Durability.**

Collections developed on microfilm are virtually permanent and, unlike paper, are much less likely to be stolen or mutilated.

**Cost Savings.**

Microform is the best way to hold down the expense of building and maintaining a serials collection. Selected volumes or years, prohibitively expensive to acquire in paper, are easily affordable on microform. Even the addition of entire backfile runs amounts to a fraction of the cost of paper reprints or used editions.

**Enrichment Value.**

Serials on microfilm can fill gaps in library backfiles to provide years of uninterrupted periodical information. Or, microform can be used to round out a library’s holdings. In fact, microform may be the only way serial titles of limited availability are accessible and affordable to your library.

**Convenient Service.**

Contact your field sales representative or call toll-free 800-521-3042 to get specific information on any title or to place an order. All the thought, planning, space and money that goes into building a great collection goes farther and lasts longer on microform. Don’t settle for anything less!

Definitive critical overviews of modern writers . . .

Twentieth-Century Literary Criticism

Excerpts from Criticism of the Works of Novelists, Poets, Playwrights, Short Story Writers, and Other Creative Writers, 1900-1960. Edited by Dedria Bryfonski and Sharon Hall. About 600 pages per volume. Cumulative indexes of authors and critics. Vol. 1 in print; Vol. 2 ready Feb. 1979. $45.00/vol.

Presenting significant passages from published criticism on authors who died between 1900 and 1960, the Twentieth-Century Literary Criticism series complements Gale's increasingly useful Contemporary Literary Criticism series, which contains excerpts from criticism on authors now living or deceased since 1960. Because each covers a different period, there is no duplication between TCLC and CLC.

Eighty major authors are covered in the first two volumes of TCLC. Each author entry furnishes long excerpts from numerous sources representing the entire range of critical response to the author. Succinct biographical summaries and bibliographies of principal works are included for all authors. Since each TCLC author section is a definitive historical overview, each 600-page volume in the series covers between 40 and 50 authors (compared to 200 in a similar-size CLC volume, whose entries may be supplemented as current new material appears). Author entries vary in length, running from six pages for Bret Harte to 42 pages for F. Scott Fitzgerald. Additional material on the same author will not be included in subsequent volumes of TCLC unless warranted by unusual and important new criticism.

Related Gale literary reference works . . .

Children's Literature Review

"Broadening its scope to include such international authors as Dennis Lee and Ted Hughes augments its usefulness as a reference; the range of critical comments and reviews reflects informed and sophisticated critical judgment. This is a truly fine volume, the best of its kind I have seen." (Russel B. Nye, Distinguished Professor, Michigan State University, and author of The Unembarrassed Muse)

"There is nothing quite like Children's Literature Review in the field today, and Gale is certainly doing a service which should be rendered." (Jane Yolen, author of numerous children's books)

"I am learning a lot from it, and, more than that, I am enjoying it enormously. I admire the range and depth of the work." (Jonathan Cott, Associate Editor of Rolling Stone and editor of Beyond the Looking Glass)

Contemporary Literary Criticism

Included in Library Journal annual selection of "outstanding reference books." (Library Journal, April 15, 1974)

"A strong effort, and the cumulative evaluation of the work should be positive." (Best Reference Books: Titles of Lasting Value Selected from "American Reference Books Annual 1970-1976")
