Letters

Performance Appraisal

To the Editor:

Dimity Berkner’s article “Library Staff Development through Performance Appraisal” (C&RL, July 1979) was an excellent example of the best in library literature. She was both comprehensive and clear in bringing a wide range of current interdisciplinary resources to librarians for their consideration and use. Her proposed performance appraisal program is sound and well presented. The specifics described enable a library staff to study and modify the ideas in the context of their own library situation.

For librarians interested in linking library staff development and performance appraisals, I would like to add two comments that may be useful. Berkner illustrates the use of the individual appraisal to assist supervisors who guide staff to meet required levels of performance and to grow beyond those levels to prepare for new responsibilities and positions. In addition to this approach, collective performance appraisal information from the library’s staff can present patterns of needs that can reveal organizational issues, trouble spots, or communication gaps. Also, performance appraisal findings for the staff as a whole can be the basis for establishing priorities for staff training just as they can be used with individual staff members to signal their training needs.

My second comment is that since the mid-1970s industry trainers and developers have made wide use of a technique called Performance Feedback and Positive Reinforcement (PF/PR) as a means of linking management principles with training and development efforts. Although I personally do not recommend it or use this method, I raise this as a point of information and an indication that this technique might be used as a potential resource.

PF/PR is based on behavior modification (Skinner) precepts and, in industry, focuses strongly on improved productivity. The process requires specified levels of desired performance with feedback given in relation to the progress made toward that level and reinforcement as a routine and frequent support to appropriate progress made. Two points are important to note whether or not operant conditioning is a desirable method for staff developers. PF/PR emphasizes the need for appraising performance frequently, more than once a year. And it links appraisal with incentives that are meaningful motivators as perceived by staff members. Training, a magazine for staff developers, has an extensive resource list of books and films on this process in the November 1978 issue.

I would also like to underline the caution made by Dimity Berkner that performance appraisal is a time-consuming process. So is staff development, but an undeveloped and inefficient staff can be very costly. Staff development may be more of an investment than an expense, and thus doubly important to be done wisely and well.—Barbara Conroy, Educational Consultant, Tabernash, Colorado.
NOYES DATA has developed two new techniques of vital importance to those who wish to keep abreast of rapid changes in technology and business conditions: 1) our advanced publishing systems permit us to produce durably-bound books within a few months of manuscript acceptance; 2) our modern processing plant ships all orders on the day after they are received.

HARDCOVER BOOKS—EARY SPRING 1980

FUNCTIONAL FLUIDS FOR INDUSTRY, TRANSPORTATION AND AEROSPACE; edited by M. William Ranney: Describes composition, manufacture and applications of functional fluids used as electric and electronic coolants, diffusion pump fluids, pressure lubricants, damping fluids, force transmission fluids (hydraulic fluids), heat transfer fluids, etc. ISBN 0-8155-0789-5; $45.

NEW DENTAL MATERIALS; edited by Paul G. Stecher: Describes new dental materials as potential replacements for high-priced silver and gold, with emphasis on acrylicates and other plastic compositions. New dental restoratives have considerable improved properties. ISBN 0-8155-0792-5; $39.

HOUSEHOLD AND INDUSTRIAL FABRIC CONDITIONERS; edited by M.H. Gutcho: Describes household and industrial formulations to soften detergent-washed fabrics, making them smooth, pliable and fluffy. ISBN 0-8155-0793-3; $54.

TECHNOLOGY OF METAL POWDERS—Recent Developments; edited by L.H. Yaverbaum: Powder metallurgical processes have acquired new significance in these energy-conscious times. There are numerous advantages to the powder metallurgy approach to the manufacture of metal items as compared to casting and forging. ISBN 0-8155-0794-1; $45.

VACCINE PREPARATION TECHNIQUES; edited by J.J. Duffy: Describes new vaccine preparation techniques. Precipitated or adsorbed preparations, as shown in this book, are more stable and will induce a longer-lasting immune response than pure fluid preparations. ISBN 0-8155-0796-8; $48.

CIP information is provided in all books.
the new SEARCH FIVE USER GUIDE for maximum access to these five Data Courier files...

- CONFERENCE PAPERS INDEX
- ISMEC
- OCEANIC ABSTRACTS
- PHARMACEUTICAL NEWS INDEX
- POLLUTION ABSTRACTS

Each section complete... with fully revised vocabularies... updated journals lists... new search samples... step-by-step instructions... and search tips for getting more out of the files.

SEARCH FIVE USER GUIDE

Available May 1, 1980: The full five-file edition in handsome, sturdy binder: $50 per set. Individual user guide for any one of the five files: $15 each, binder not included.

SPECIAL PRE-PUBLICATION DISCOUNT ON BINDER SETS: $40 if ordered before May 1st ! ! !

Data Courier, Inc., the database company
620 South Fifth St., Louisville, KY 40202 U.S.A.

DATA COURIER, INC. – Dept. RC-32

FOR SPECIAL NEW TITLES
FROM GAYLORD
PROFESSIONAL PUBLICATIONS.

Unique and valuable titles for the library
(and the librarian!).

☐ What Else You Can Do With A
Library Degree. Betty Carol Sellen, ed.
Shows how a library degree can be used
profitably in numerous other fields:
includes articles by over 50 librarians
working outside the library profession.
A goldmine for the information-
specialist who wants to find, or create,
the perfect job.

☐ Collection Building: Studies in the
Development and Effective Use of Library
Resources, Vol. 2, No. 1, 2, 3. Arthur Curley,
A serial serving the need for more focused,
user-oriented, budget-conscious collection
building in libraries of all sizes.

☐ Sources: A Guide to Print and NonPrint
Materials Available from Organizations,
Industry, Government Agencies and
Maureen Crowley, ed. No. 9370 $50 per year.
ISBN 0-915794-16-0. A librarian's Whole Earth
Catalog containing over 1800 annual listings of
hard-to-find materials, many of which are free
or available at nominal cost. "...a valuable
and necessary serial for all libraries."
—Library Journal

☐ Continuing Education: A Guide to Career
Development Programs, 2nd Edition. No. 6788
$39.95. ISBN 0-915794-10-1. The 2nd edition of
this unique directory to occupation-oriented
educational opportunities; a guide to advanced
training in thousands of jobs and professions in
more than 150 major career areas.

☐ Black Plots and Black Characters. By Robert L.
The only handbook for librarians, teachers
and their students covering the last two
centuries of Black Literature. Includes a
dictionary of Afro-American literature, plot
summaries and commentary for 95 major
works, and extensive bibliographies.

☐ Index to Illustrations of the Natural World;
Where to Find Pictures of the Living Things
of North America. John W. Thompson, comp.;
Nedra Slauson, ed. No. 6910 $29.95. ISBN
0-915794-12-8. A welcome tool, leading you to
clear and accurate illustrations of the plants,
birds, mammals, reptiles, and sea life of North
America. Indexing by English language names,
with scientific names also given, and "see also"
cross references.

☐ The Principal's Handbook on the School
Library Media Center. By Betty Martin and Ben
Focuses on the administrator's contribution to a
first-rate media center and program, with lists of
specific requirements and evaluative criteria.
"It's a 'must' item for every principal's and
school media specialist's desk."
