Conventional wisdom. Uncommon access.

Constitutional conventions and other means of constitutional change have played a critical role in shaping the government of each of the fifty American states.

But, while the documents produced by these revision efforts are vital in understanding the intent and context of changes, they generally have been difficult to identify and obtain.

Now, however, CIS makes these important resources readily accessible with its State Constitutional Conventions, Commissions, and Amendments microfiche file and corresponding bibliography.

The Updated Microfiche File

With the latest update in its State Constitutional Conventions micropublishing program, CIS delivers unprecedented coverage of some 3,700 documents from as early as 1776 through recent times. Encompassing official and unofficial documents, both published and unpublished, the file is available by state or as a comprehensive collection covering all 50 states.

The New Bibliography

CIS's new annotated bibliography provides cumulated access to the period 1959-1978, updating and enlarging the coverage of previous finding aids. Published in two clothbound volumes totaling 1,400 pages, the new bibliography lists all documents issued during specific periods of revision activity in each state. In addition, it enables you to identify documents by personal and institutional author. It can be

used not only with the microfiche file, but also as an independent reference resource.

Send For Our Free Brochure

It's conventional wisdom that you should get the facts before you act. So send for our free brochure and find out why this important microfiche collection and bibliography should be a priority acquisition for your library.

Please send your free brochure describing CIS's State Constitutional Conventions bibliography and microfiche file. I understand there is no obligation.

Literature of Medieval History 1930-1975:

A Supplement to Louis John Paetow's
"A Guide to the Study of Medieval History"

Compiled and edited by Gray Cowan Boyce
Sponsored by the Medieval Academy of America

*"Gray Cowan Boyce is the twentieth century's greatest bibliographer of medieval scholarship. Every student of any aspect of the amazingly varied and creative millennium called the Middle Ages will find indispensable this 1981 treasure trove that Boyce too modestly calls a **Supplement to Paetow**. Its publication makes possible a new sophistication in the study of the shaping of Western civilization."*

—Lynn White, Jr.
University Professor of History, Emeritus
UCLA

"No university, college, research, or museum library can afford to be without this work which is the most comprehensive in existence. All medievalists will be grateful to see it on the shelves of their libraries."

—Bryce Lyon
Barnaby C. and Mary Critchfield Keeney Professor of
History, Brown University

This long-awaited reference work supplements Paetow's landmark GUIDE with a comprehensive bibliographic list of the 55,000 works on all aspects of medieval history and culture published between 1930 and 1975. Worldwide in scope, the 5-volume set is divided into three parts—General Books, General History, and Medieval Life and Culture—each of which is further broken down into specific sub-categories totaling more than 3000 in all. An author and subject name index is provided.
