ROBERT SWISHER AND PEGGY C. SMITH, Journals Read by ACRL Academic Librarians, 1973 and 1978

WILLIAM J. MAHER, Measurement and Analysis of Processing Costs in Academic Archives

EUGENE P. SHEEHY, Selected Reference Books of 1980–81
Biological & Agricultural Index

The Quick, Easy Approach to Information in the Life Sciences

“Highly recommended to all libraries needing a professional indexing tool in the life sciences…”

American Reference Books Annual

Librarians, teachers, students, and others who do research in the pure biological sciences and agriculture know the value of Biological & Agricultural Index. As a cumulative index to 202 English-language periodicals, the Index offers the researcher the most complete and current indexing of important life science periodicals in a quick and easy-to-use format. The subject approach is interdisciplinary in nature.

Among the more than 25 subject fields covered are:

- Biochemistry
- Botany
- Ecology
- Environmental Science
- Food Science
- Genetics
- Horticulture
- Marine Biology
- Microbiology
- Nutrition
- Physiology
- Zoology

Entries are arranged alphabetically by subject and include complete bibliographic data. Specific yet flexible subject headings, numerous cross-references, and use of technical as well as everyday science terminology provide many approaches. Separate sections contain author citations to book reviews and subscription information about the periodicals indexed.

Published monthly except August, with quarterly cumulations and permanent bound annual cumulations. Sold on the service basis rate. For more information, please write to: Dept. 99
