Risk Management

You want to give your patrons expanded access to information by letting them search online databases. But how do you control costs?

With FirstSearch, you pay by the search, not by the minute. **Patrons can search key databases like the OCLC Online Union Catalog, ERIC, The GPO Monthly Catalog, Consumers Index, plus 17 popular H. W. Wilson databases, without the risk of connect-hour charges mounting up while they search. And now the OCLC/Faxon Finder databases—ArticleFinder and ContentsFinder—provide unparalleled access to serials information.**

Give your patrons FirstSearch Cards that authorize 10 or 25 searches, and you'll have a new way to control usage. Or sell cards, if you wish, and recoup costs. You can even get a refund for searches you don't use at the end of the year.

FirstSearch eliminates the risk of hidden costs you'll discover with CD-ROM or locally mounted databases. Extra equipment, a rewired network, time lost in training staff and patrons—it adds up. Instead, FirstSearch uses your existing computer and phone line and ties directly into your local system OPAC. **And our interface is so easy to understand, even novice users can start searching with no training.**

Call us today for more information. With your FirstSearch, we'll change your mind about the risks of online databases for patrons.
