# A BETTER WAY TO SEARCH DATABASES

We started in 1985, database searchers committed to better search software design. We became the premier vendor of Medline, then expanded our catalog to other databases. Last year we won Information World Review's PRODUCT OF THE YEAR for faster, easier search

software. But a better way means meeting the evolving needs – individual and campus wide – of today's library users.

Announcing OVID: a database interface also flexible it molds itself to your search environment.

*With OVID you're free to move from one operating system to another without retraining. OVID's Common User Interface assures identical functionality in DOS, Windows and UNIX.*

*A haven for beginners, OVID's Easy Mode has on screen prompts. The more experienced can pull-down menus showing an array of search options. Experts will feel at home using online syntax.*

*Search with natural language if you like. OVID mapping cuts through the mystery of controlled vocabularies, homing in on precisely matching subject headings.*

*There's an unprecedented array of search tools – indexes, thesauri, limits and fields – many never before available in an interface. They're all standard OVID features.*

*HELP for every search function is context-sensitive and on screen, never more than a key-stroke or mouse click away.*

**OVID. A better way to search ERIC, Current Contents, PsycINFO\*, Medline, Readers' Guide Abstracts, EMBASE and more.**
