Library App Competition

I+Library

Team 6
App Overview

The UIUC libraries hold an immense amount of resources and information. Our app will take advantage of this by allowing users to easily browse through the catalog and databases, see upcoming events, and reserve rooms or loanable tech.
Current Problems

- Resources either unknown or underutilized
- Cannot reserve or get alerts for loanable technologies
- Unaware of computer lab and study room availability
- No centralized board for events
Target Audience

Audiences are mainly students and faculty, and any affiliate of the University of Illinois who would benefit from the services of the app.

How App will Improve

- Raise awareness of library services and facilities
- Raise awareness of local academic and cultural events
- Centralize various functions and features
- Improve overall college experience
Additional Ideas

• Study area rating system
• List all resources in all libraries
• Social media incorporation
Any Questions?
