PLAN OF ASSEMBLY
TRUSS # 4
GEOMETRY OF TRUSSES AND FRAMES
The only variable dimension of concern is the length of the "flat top-chord" on the intermediate truss, the gussets, the height of each truss, and the length of sloping top-chord. The only geometric relation that needs to be considered is that the top chord of the hip is equal to the length of the gusset plate from the hip member to the peak member and the offset double-beveled cut on the hip member is equal to the gusset plate from the hip member to the peak member.

TRUSS #4

HIP-ROOF NAIL-GLUED TRUSSES FOR 3/12 SLOPE
SPANS 25'-0" TO 28'-8"

PLAN OF ASSEMBLY

OUTRIGGER and TERMINAL TRUSS SECTION
Spans 25'-0" to 28'-8"

PLAN OF CORNER ASSEMBLY

SECTION THROUGH HIP-ROOF ASSEMBLY AT 36'-0"
