July 2013 – Kick-off Meeting
The speakers will discuss their experiences working with users to manage research data and provide case studies of how those services have been implemented. We hope the first meeting of the Research Data Services Interest Group will facilitate discussion concerning the issues and challenges of managing research data, the role of the Library in creating and implementing services, and what research data services might look like for users.
*Panelists*: Harriett Green, Bill Mischo, and Sarah Shreeves

September 2013 – Campus Research Data Service
The campus’ Visioning Future Excellence report includes a new Research Data Service as one of six strategic initiatives, and the Library will have an integral role in this emerging service. Come learn and ask questions about the campus Research Data Service being developed.
*Panelists*: Beth Sandore, Sarah Shreeves, and Charley Kline

October 2013 – Conversation about Reproducible Research
In connection with Victoria Stodden’s talk “Opportunities and Challenges for Open Data and Code: Facilitating Reproducibility” ([http://go.illinois.edu/vstodden](http://go.illinois.edu/vstodden)), this meeting will be an opportunity to continue the conversation about reproducible research with Victoria and other interested researchers on campus. Come discuss and ask questions about open data, open code and reproducible research.
*Panelists*: Victoria Stodden and Mark Fredrickson

November 2013 – Purchasing Datasets
Come to this session to hear about the library’s experiences with purchasing raw data, which needs to be analyzed in software. The library has purchased data ranging from satellite imagery to text files to genomic data, and some of us have learned a lot about how these purchases are similar to and different from purchasing other electronic materials.
*Panelists*: Tom Teper, Lynn Wiley, and Karen Hogenboom

December 2013 – Getting up to Speed with Research Data
This meeting will be an opportunity for attendees to share resources for getting up to speed with research data, whether it’s a conference, a publication, a blog, a listserv, or anything else. If you’ve found something particularly helpful, please come and share it with the group, and if you want some ideas for learning more, come and hear suggestions from your colleagues.

February 2014 – Conversation about Data Sharing
In connection with Heather Piwowar’s campus visit, this meeting will be an opportunity to discuss data sharing and data citation. To help prepare for the meeting, you could review the PeerJ article written by Heather Piwowar and Todd Vision – “Data Reuse and the Open Data Citation Advantage” ([https://peerj.com/articles/175/](https://peerj.com/articles/175/)).
*Panelist*: Heather Piwowar
March 2014 – DMPTool 2
The DMPTool (https://dmptool.org/) is an online wizard for creating data management plans for grant proposals, and the DMPTool 2 is scheduled to be released in May 2014. Sarah Shreeves, who has been directly involved in DMPTool planning and development, will demo the DMPTool 2, especially highlighting new features and enhancements. The DMPTool 2 will provide more institutional control over customizations, and the eResearch Implementation Committee hopes to involve small groups of subject librarians in discussing and deciding customizations for grants in their areas. To get things rolling, time will be set aside at the end of the meeting for small group work and discussion.
Presenter: Sarah Shreeves

April 2014 – Digital Humanities
Come to talk with some of our colleagues who are working in the area of digital humanities. The discussion panel will feature three UIUC librarians discussing their work in digital humanities through collaborations with faculty and researchers, as well as their own research work.
Panelists: Harriett Green, Kirk Hess, and Caroline Szylowicz

May 2014 – Data Information Literacy
Last September the four speakers attended the Data Information Literacy (DIL) Symposium at Purdue. The Symposium was part of the IMLS-funded DIL project (http://wiki.lib.purdue.edu/display/ste/home) that investigated DIL needs of scientists, and developed and implemented DIL instruction programs. During the interest group meeting, we will briefly review the DIL project and present the 12 DIL competencies proposed by the project, especially as they relate to the Library’s Statement on Learning Goals (http://www.library.illinois.edu/infolit/learninggoals.html). A majority of the meeting will be devoted to small group discussions of program development scenarios and a large group discussion about potential DIL roles, training, and implementations at UIUC. The program development scenarios are available for different disciplines (See the Scenario links listed under Tuesday, Sept 24th - http://wiki.lib.purdue.edu/display/ste/Materials+for+the+DIL+Symposium); if you have time before the meeting, we encourage you briefly familiarize yourself with one scenario of interest to you, but if you don’t have time, don’t let that discourage you from attending the meeting!
Panelists: Lisa Hinchliffe, Karen Hogenboom, Christie Wiley, and Sarah Williams

July 2014 – Reporting back from conferences
So far this year many Library faculty and staff have attended conferences, workshops and sessions related to research data. This meeting will be an informal opportunity for attendees to share information and resources that you learned about at these professional events. If you learned about something particularly interesting or valuable, please come and share it with the group, or if you are interested in learning more, come and hear what your colleagues have picked-up.
