

LIBRARY APPLICATIONS OF DATA PROCESSING:
A SELECTED BIBLIOGRAPHY, 1963-64*

Compiled by James Krikelas

The scope of this bibliography has been limited to actual applications of data processing machines for the mechanization of library routines. General survey articles have been included only if they deal, wholly or in part, with operational or pre-operational programs. Published material dealing with information retrieval, such as reports of the programs at Western Reserve University and the National Library of Medicine, has been excluded.

The increasing interest of librarians and information specialists in convening and discussing their problems in relation to automation has produced a number of significant meetings during the past two years. In addition to the annual proceedings of the Clinic held at the University of Illinois, the published reports of the Arlie Foundation Conference¹ and the 1964 ALA Pre-Conference Institute at the University of Missouri² may be of special interest.

*Articles published in 1963 that appear in the McCormick bibliography (cited below) do not appear in this list; one item (no. 13) published in 1962 has been added.

McCormick, Edward Mack. "Bibliography of Mechanized Library Processes." In Herbert Goldhor, ed., Proceedings of the 1963 Clinic on Library Applications of Data Processing. Champaign, Ill., Distributed by the Illini Union Bookstore, 1964, pp. 157-176.
