

INDEX

A

- Acquisitions system: automated, 76, 81-85; criteria for design, 55-64.
- Administration, effect on library automation, 75-80.
- ALGOL, 68.
- Assembly language, 16, 115.
- Autocoder language, 3, 115, 141.
- Automation: equipment, 115-116; objectives for a library program of, 75, 115; organization of, for a library program, 115.

B

- Batch processing, 8, 16, 116, 122, 124, 143.
- Bell Laboratories Libraries, automation of, 14-30.
- BELLREL system, 14-30: applications, 20-28; characteristics, 16-19; cost, 29-30; daily transactions, 29; environment, 14-15; objectives, 15; problems, 29.
- Bibliographic records, automated, 8, 11, 38-39, 68-69, 116, 119, 122.
- Book catalogs, automated, 42-43, 69, 72, 85, 129-30.
- Books, over-the-wire transmission, 9.

C

- Card-automated reproduction and distribution system, 98-113.
- Card division operation: automation of, 99; equipment, 100-101, 106, 110.
- Catalog: on-line, computerized, 42; listing system, 85; standardization of, 35-37, 48.
- Circulation systems, 87, 131-132, 135-143: automated, 16-18, 53-55, 87, 116, 131, 135-143; capabilities, 138-140; on-line, 14-30, 135; punched card, 5.
- COBOL, 3, 16, 68, 90.

- Computers: advantages of small machines, 2-3, 5; applications for libraries of the future, 8.
- Computer language, 68: capabilities, 69, 74; disadvantages, 74.
- Computer storage of bibliographic records: controlling a collection, 26, 72; costs, 8-9, 27-30; generating overdue notices, 26; impact on accounting, 26; locating a book, 20; managing information resources, 26; problems, 29, 68; servicing requests, 23.
- Computerization: of acquisitions systems, 55-64, 76, 81-85; applications of, at Harvard, 6-7; of book catalogs, 42-43, 69, 72, 85, 129-130; of circulation systems, 16-18, 53-55, 87, 116, 131, 135-143.
- Computerized catalog, 12, 42: advantages, 42; restrictions, 42-43, 48; suggestions for, 43.
- Cooperative processing of library materials, 31: advantages, 32; costs, 32; equipment, 33; standardization required for, 33.
- Cooperative cataloging processing: advantages of, 32-33; standardization versus variation, 33-34, 35-38, 39.

D

- Data base, updating and querying of, 67-71.
- Data processing, administration and organization for, 75-80.
- Digital storage versus microfilm, 9.
- Duplicate and canceled record check, 119, 121.

E

- Error correction program, 4-5, 119.
- Error routines, 7.

F

FORTTRAN, 68, 90.

H

Harvard University Library, automation of, 2, 5-8.
HOS (Hybrid Operating System), 144-145.

I

Indexing and abstracting, automatic, 10, 11, 48.
Information networks, definition, 31-32.
Intrex, 12.
Integrated system concept, 116.
Inventory systems, 26, 88.

L

Library of Congress card division: automation of, 99-113; problems of, 98-99.
Library networks, 31-41: definition, 31-32.
Library order cards, 118-119.
Loan system, on-line, 87-88.

M

Machine-readable: books and journal texts, 9, 10-11, 69; catalog data, 9; formats for bibliographic records, 38-39; records, 8, 9, 33, 38-39, 68-69, 116, 119, 122; utilization for card division, automation, 110.
Macros, 3, 6.
MARC Project, 1-5, 35, 36, 38, 39, 43, 69, 76, 110.
Maps listing systems, 90.
MFT (Multiprogramming with a Fixed Number of Tasks), 16.
Microfilm, 12: versus computerized storage, 9.
Microphotography, 9: advantages, 9; costs, 9; disadvantages, 4.

Midwestern University Library, automation of, 135-143.
Moffitt Library, 135-143.

N

NELINET (New England Library Information Network), 8, 32-38, 39: cost of storing bibliographic records by on-line random access, 8; purpose, 35-36.
Notify cards, 124.

O

On-line acquisitions system, criteria for design, 50-66.
Out-of-print desiderata system, 89.
Optical scanner, 9, 10, 100, 101.

P

Pamphlet listing system, 89-90.
PL/I, 3, 67-74, 81, 88, 90-97: capabilities, 74, 90, 91; disadvantages, 74; library programming applications, 81-97.
Programming language, requirements of, 68-69, 74.
Purchase orders, in an automated system, 123-124.

R

Record maintenance, automated, 121-122.
REI (Recognition Equipment, Inc.), 100-103.
Reproduction and distribution systems, card automated, 98-113.
RFP (Request for Proposals), 108.

S

Serial listing system, 17, 89, 122.
Shared resources, 31.
Sharing concept in libraries, 31.
Simon Fraser University Library: automation of, 81-90; effect of

library administration on, 75-80;
 use of PL/I, 90-97.
 Source document, 116-118.
 Spectra programs, 115-116.
 Standardization of cataloging versus
 variation, 33-34, 35-38, 39.
 Sort program, 6, 106.
 Sterling Memorial Library, 44.
 Systems analyst, 77.

T

Tarrant County Junior College
 Libraries, automation of: applica-
 tion of, 116-131; definition and
 description of, 116; equipment
 used, 115; objectives of, 115; or-
 ganization of, 115.
 Technical Information Libraries net-
 work, 15.
 Technical Proposal Evaluation Group,
 108.

V

Variable length records, 91, 94.
 Videocomps, 110.

W

Washington State University Library:
 application of automation, 69,
 72-74; automation of acquisitions
 system, 55-64; automation of
 circulation system, 53-55; criteria
 for automation of, 51-53.
 Widener punched card circulation
 system, 5.

Y

Yale University Library, study of
 catalog users, 44-48.
