INDEXING AND ABSTRACTING IN THEORY AND PRACTICE

3rd edition

By **F. W. Lancaster**

"Lancaster's work stands by itself as a superior textbook for a course on indexing and abstracting, or as a supplement for any number of courses in related areas (e.g., database management, information retrieval, introductory organization of information, etc.)." —*Technicalities*

AWARD-WINNING TEXT UPDATED

The third edition of this widely respected manual of best practice is even more comprehensive than the first edition, which won the 1992 ASIS Best Information Science Book Award. Fully revised to address changes since 1998—especially in the areas of multimedia sources, text searching, automatic indexing, and the Internet—this edition is illustrated throughout with useful indexing and abstracting guidelines for student and practitioner. Covered areas include:

- indexing principles and practice
- pre-coordinate indexes
- consistency and quality of indexing
- types and functions of abstracts
- writing an abstract
- evaluation theory and practice
- approaches used in indexing and abstracting services
- indexing enhancement
- natural language in information retrieval
- indexing and abstracting of imaginative works
- databases of images and sound
- automatic indexing and abstracting
- the future of indexing and abstracting services

In addition to use as a text, *Indexing and Abstracting in Theory and Practice* holds value for all individuals and institutions involved in training for information retrieval and related activities, including practicing library and information professionals, database producers, those engaged in portal design, and all professionals involved in knowledge management in general.

ISBN 0-87845-122-6 • 464 pp • cloth • \$57.50
