It is hoped that this list may be an aid in the selection of books for young people. The annotations are intended to be descriptive rather than critical. The sources of these are given; unsigned notes are by the compiler.

Volume and page numbers are separated by a colon, and the date is separated from these by a semicolon; e. g., Dial 26:162;

March 1, 1899 means Dial, volume 26, page 162 of the issue of

March 1, 1899. In some cases a second reference has been given, when it was thought that it would add something definite in the description of the book.

Publishing firm are denoted by the names of the first members. The date following this is intended to be the date of the latest edition in each case.

Books starred were found in the lists of "Best books" for 1897, 1898 and 1899, prepared by the New York state library.

The proportion of books in each class is as follows:

Amusements and occupations, 4-1/5 Biography, 7-4/5 Fairy tales, etc., 16 Fiction. 19-1/5 Fine arts. Government and administration 4/5% History (including historical fiction), 23-4/5% Picture books, 4-1/5% Poetry, Religion and ethics, Science, 10-4/5 Travels, etc..

The following list contains the principal abbreviations used; other abbreviations are self-explanatory.

\$1.50

The "Golden Legend", with its admirable pictures by Mr. T. H. Robinson, would have interest for us if only because it was "W. V." But in itself there is an exquisite beauty. It is made up of tales of the saints and martyrs told as a poet might tell them to a child he loved. He makes these austere heroes more fascinating than fairies, more beautiful than princesses, and very human. Yet he is true to the simple old legends and the hidden significance of them becomes visible in his hands...

\$ 1.50

It was an excellent idea of E. B. Alton, formerly a page in the U. S. Senate, to tell the story of his life as a page... and publish it...for the benefit of the boys of America...It is written for boys, but most adults can read it with profit, for the rules and proceedure of Congress are a deep mysterytor the rest of the world. It contains a graphic picture of the actual administration of our Government...There are very few phases of public life in Washington which are not described here with more or less fullness.

...being a first book of knowledge of natural history, botany, physiology, physics, and chemistry for young people. The purpose of the author is to teach the boy or girl, first to observe, and second to question. It is wide field the author has attempted to cover, but with the aid of the scientific experts into whose hands the manuscript was placed, there need be no doubt of its accuracy as there certainly can be none of its attractiveness. That child must be dull indeed who does not find a charm in these pages. There are scores of illustrations from a primrose and a bird's egg to a suction pump and voltage battery.

It would be hard to find a pleasanter road to astronomical knowledge...Its simple story-book style has not interfered with the scientific accuracy nor excluded the consideration of many obscure and not generally understood matters. From the somewhat familiar lore of sun, moon, and inner planets, the author has passed on to include such...subjects as how Neptune was discovered, how we find the distances of the stars, and what they are made of...When an author succeeds in making clear and fascinating stories out of such themes, he is entitled to very high praise, and the present work is quite a masterpiece of this art...

Mr. Howells collects under this title five stories... They are distinguished from the books of fairy tales by the methods of their relation; they are told to his little girl and boy by a fond papa, their interruptions and comments being numerous. The first story tells the unfortunate fate of a little girl who wished to have Christmas every day; her wish was granted her by a wise fairy. The story of "The pony-engine and the Pacific express," is perhaps the most ingenious of the five, but "The pumpkin-glory", "Turkeys turning the tables", and "Butterfly flutterby and Flutterbybutterfly" are all tales told with a finish and point which older readers will appreciate thoroughly.

The plan of this fairy book is to have various persons of nursery lore, such as Cinderella, Ali Baba, and Boots, tell stories to be illustrated by Mr. Pyle. This part of the work he has done charmingly. Whenever the aerial motion of a flying-carpet or wishing-stool is the subject, the design is peculiarly happy, not to say flighty. But the text - then one wishes Grimm and Scheheraxade might have been left to their own devices of speech. To them can most of the substance of the tales be traced, and the transfer to the lips of new tellers does not add greatly to their charm.

Cary, Alice. Clovernook children.
Armstrong, 1883.

\$1.25

We are glad that Alice Cary's Clovernook children has survived the competition of thirty years, and is reissued to do its part in satisfying the cry of the nursery for stories, more stories; and, also let us add in shaping the moral sense of its small readers. These tales are pictures of the writer's youthful experience in Ohio, and are pleasantly written despite their undisguised ethical purpose...

Cervantes, Saavedra, Miguel de. Don Quixote; ed. by Clifton Johnson.

Macmillan, 1899.

\$.75

Don Quixote and his funny squire Sancho Panza, are two of the most notable creations in all fiction, and their remarkable adventures have given pleasure to multitudes in the past, and will no doubt delight and amuse generations to come. This edition is based upon the translation of John Ormsby, unquestionably the best English version ever made,— and is practically unchanged, except for some omissions, the effect of which has been to bring the book down to readable proportions and at the same time to make the tale thoroughly clean and wholesome.

Its opening scene is in the little frontier town of Bismark in Dakota, which is attacked by the Indians. \$1.00

It would be hard to find a more vigorous and well told story of schoolboy life. The whole book is instinct with manliness and right feeling. Jack, the hero, is a brave intelligent and resolute lad, whose unfolding character reveals all the germs of a noble manhood...Perhaps he shows too mature decision for his years, but that one error may be forgiven to the idealism of the author. The accounts of the different games...ought to furnish valuable hints to the boy readers... The book is an eminently delightful one.

Mrs. Overtheway is the quaint name which poor little Ida, whom everybody supposes to be an orphan, gives to a dear old lady who lives "over the way" behind a green gate and up three white steps. Ida first watches her, then in imagination she invites her to a tea party, and finally she comes to know her in reality; and then Mrs. Overtheway turns into a kind friend, and a delightful story-teller, until Ida's father, the sea-captain, who has been thought lost at sea, comes home alive and well. The whole is a charming collection of short stories bound together by a very pretty thread.

The family life of the hard-worked clerk is true and sweet, and when the millionaire Livingstone borrows dear little Kitty to show him how to buy christmas gifts and where to bestow them, it is a foregone conclusion that things are to take a turn in his life and everybody is going to be better for this sweet partner of Santa Claus. ... In the midst of mediocrity and emptiness that are conjured up in the name of child-hood, it is good to come upon a writer who has his hand on life. This story of the slums is the biography of the humpbacked son of a wandering flute-player; yet ... there is no sniffling, no exageration of the inevitable pathos ... Tony himself is a creation, a real boy; and they are very genuine emotions and imaginings and heartaches to which we are bluntly introduced. There is tenderness underneath the author's admirable reserve, his heavy and rugged outlines; and it makes the sensitive and imaginative little cripple vivid to one's fancy. The little heroing, Estabel Charlock, is fifteen when introduced. "She was being brought up in sections, as it were," the author says, "by two aunts, in very irregular alternations." One aunt was the village milliner, the other a conparatively rich woman, living in a city. When Estabel is fifteen her city Aunt, Mrs. Clymer, claims her for her own, and a long vista of joy opens to the young girl - an education, the delights of books, art, music, etc. The story does not stray very far from the home, and the homely incidents, Mrs. Whitney knows so well how to portray. It has its romance, and ends with a prospective marriage. The heroing illustrates, with her own little problems, the impossibility of putting square pegs into round holes.

Stables, Gordon. To Greenland and the pole; a story of adventures in the Arctic regions.

Scribner, 1895. \$1.50

It is pleasant to meet with a story of adventure for boys that can be so heartily recommended as this. Though there is no lackof exciting incidents, they are never of so improbable a sort as to verge on the impossible; and indeed many of the Arctic experiences are drawn from the author's own journals. The youthful heroes do not imperil their own lives, and others as well, by willfulness or insubordination, as is too much the habit of their contemporaries in similar American fiction...

It is the record, recited by the older, of the travellers of two boys, aged respectively sixteen and fourteen, through the South and the Bahamas. The addition of a bright young girl to the party, with a hint of chaperonage in the person of an erratically sensible mother and an eccentric father, lends interest and piquancy, to the adventures, which are not too improbable... The relations between the boys and Corny are very nicely managed, and the book closes with a hint of school and college instead of hymeneal prospects.

Much of Mr. Starr's information has been gained by personal knowledge and older people as well as children can profit by this book.
